There are many parts of speech, each with its own place in a sentence. Here are several of those parts:

Nouns name people, places, things, or ideas

Verbs show actions or a state of being

Pronouns used in place of nouns

Adjectives modify nouns or pronouns

Adverbs describe or modify verbs

Prepositions show relationships

Phrases groups of words that together are used in place of another part of speech

Parts of Speech - Review

Read the page and trace the key words.

Some examples of parts of speech:

Nouns: sister, home, Texas, liberty, rock

Verbs: jump, run, carry, am, is, are, was, were

Adjectives: nice, tall, blue, happy

Adverbs: quickly, roughly, smartly, boldly

Prepositions: of, in, between, under, at, for

Phrases: in the tree, between the two trees, under the tree, over the door, around the corner, before the holidays, with a hammer, at the store, next door, for my mother

The _____ dog chased the rabbit _____
adjective adverb

around the yard. The _____ dashed
noun

under a _____ bush to hide. The
adjective

dog _____ frantically _____
verb preposition

the _____. The _____
noun adjective

rabbit would not come out from _____
preposition

the bush.

Find the words from the Word Bank in the Word Search.

Pronouns are a part of speech that is used in place of nouns. Pronouns stand in the place of names of people, places, things, or ideas.

Example: The black clouds gathered; <u>it</u> looked like rain.
(In the sentence above, "it" is a pronoun.)

The part of speech that can modify a verb, another adverb or an adjective is an **adverb**.

Example: It was raining <u>**heavily**</u>.
(In the sentence above, "heavily" is an adverb.)

A **preposition** is the part of speech that shows a relationship among other words in the sentence.

Example: The lighting <u>in</u> the cloud was spectacular; <u>**against**</u> the dark night, it lit up the sky.
("In" and "against" are both prepositions in this example.)

Phrases are groups of words that function as a single part of speech.

Example: Birds were flying high in the sky; they were <u>**in a "v" formation**</u>.
("In a "v" formation" is a phrase that is functioning as an adverb in the example sentence above.)

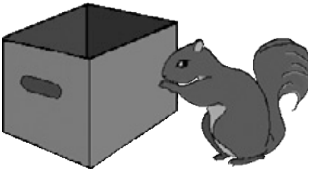
What is a preposition?

A preposition is a word that shows a relationship between a noun, pronoun, or phrase and other words in the sentence.

Following are some common prepositions:

in, at, on, off, of, out, with, below, by, to, for, around, between, amid, besides, among, from, before, above, under, into, throughout, across, near, down, behind, underneath, up, including, upon, about, after, down, until, and without.

Prepositions show relationships!



The squirrel is **beside** the box.

Prepositional phrases must have two parts. Prepositional phrases start with a preposition and have an object of the preposition. However, most prepositional phrases are made up of three parts: the preposition, the object of the preposition (which is a noun or pronoun), and any modifiers (adjectives) of the object of the preposition.

Example: The house **between the trees** was painted white.

Between is the preposition, **trees** is the object of the preposition, and **the** is an adjective (modifier) for trees.

The entire prepositional phrase modifies the noun **house** and is used as an adjective. Remember, prepositional phrases can act as adjectives to modify nouns or pronouns. If a prepositional phrase is acting as an adjective, the phrase answers the same questions an adjective does - **which one, what kind, how much, or how many.**

Notice that "between the trees" answers the question, "Which house?" so it is an adjective phrase.

A group of words is called a phrase.

A group of words beginning with a preposition is a prepositional phrase and usually has three parts: the preposition, the object of the preposition, and frequently adjectives for the object of the preposition.

The noun that follows a preposition is called the object of the preposition. A prepositional phrase that modifies a noun or pronoun is called an adjective phrase; it can answer the questions how many, which ones, which kind and how much. It should be placed near the word it modifies.

The squirrel **<u>in the box</u>** is gray.
"In the box" begins with the preposition "in" so it is a prepositional phrase.
"In the box" answers the question, "Which squirrel?" so "in the box" is an adjective phrase.

E	Y	Y	G	Y	D	R	A	N	K	A	P
V	I	L	N	D	F	I	X	I	E	T	B
O	T	F	O	O	L	I	S	H	L	Y	R
B	E	Y	O	N	D	F	A	T	I	A	E
A	N	O	N	Y	M	O	U	S	L	Y	V

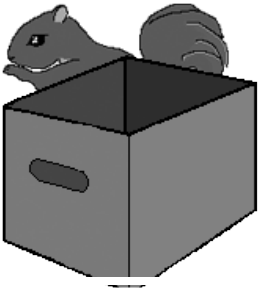
The parts of speech include pronouns, which stand in place of nouns; adjectives, which describe or modify nouns or pronouns; adverbs, which can modify a verb, another adverb, or an adjective; prepositions, which show relationship to other words in the sentence; and phrases, which are groups of words that are used in place of other parts of speech.

Prepositional phrases that show a relationship to a pronoun or noun are called

adjective phrases.

When prepositional phrases are used in place of an adverb, they are called

adverb phrases.



The squirrel is hiding **behind the box**.
"Behind the Box" is a prepositional phrase being used as an adverb. Therefore, "behind the box" is an adverb phrase.

A prepositional phrase that modifies a verb, an adverb, or an adjective is called an

adverb prepositional phrase.

An adverb prepositional phrase can answer a variety of questions:

how, where, when, and to what extent.

An adverb prepositional phrase usually has three parts: a preposition, an object of the preposition, and an adjective modifying the object of the preposition.

An adverb prepositional phrase is close to the word that it modifies.

An adverb prepositional phrase usually has three parts: the preposition, the object of the preposition, and an adjective which modifies the object of the preposition.

Example: The rabbit *raced* <u>in large circles</u> when chased by the dog.
This is an **adverb prepositional phrase** because it modifies the verb *raced*.

The <u>in</u> is the preposition, <u>circles</u> is the noun that is the object of the preposition, and <u>large</u> is the adjective that modifies the noun <u>circles</u> which is the object of the preposition.

The adverb prepositional phrase is close to the verb *raced* which it modifies.

This adverb prepositional phrase answers the question how.
An adverb prepositional phrase can also answer the questions where, when, and to what extent.

Prepositions show relationships.

Example: The boat was **in the water**.

The word **in** in the prepositional phrase is the preposition, the word **water** is the object of the preposition, and the word **the** is an adjective for the noun water.

The entire **prepositional phrase** is an adverb for the verb was, telling where the boat was.

Example: The kite flew **far above the trees**.

The preposition is **above**, the object of the preposition is the plural noun **trees**.

The entire **prepositional phrase** is an adverb describing the adverb **far**, telling how far the kite flew.

1) An adjective prepositional phrase can modify a/an?

verb adverb noun preposition

2) An adjective phrase can answer the question?

where how much who why what

3) An adjective phrase can also answer the question?

where who how many why

4) An adjective phrase usually has how many parts?

8 0 5 3 2 4

5) An adjective phrase should be placed _____ the word modified.

Prepositions & Phrases

Unscramble the words.

Diagramming a sentence means you use lines to show relationships.

The purpose of diagramming is to separate the main words (the subject and the predicate) in a sentence and to have words or phrases show how they modify the main words. In diagramming a sentence, the subject and the predicate are separated by a straight vertical line. *Example:* Cindy | skied

Adjectives and adverbs are on slanted lines below the subject or predicate.

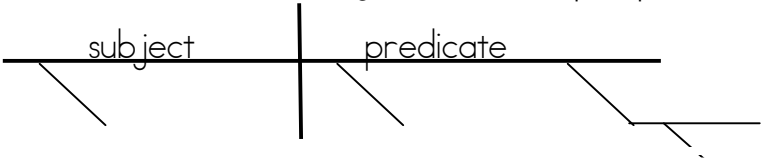
Diagramming Prepositional Phrases *Read and trace the key words.*

The purpose of diagramming is to show the relationships between words in a visual manner, much like the framework of a house. When a sentence is diagrammed, you can see the structure of the sentence.

Diagramming uses horizontal, vertical, and slanted lines.

To begin, a horizontal base line is drawn. A vertical line is drawn that passes through the base line. The main noun, or subject, and the predicate (verb) are written on either side of the vertical line. All modifying adjectives, adverbs, adjective prepositional phrases, and adverb prepositional phrases are on slanted lines beneath the words they modify.

When diagramming a prepositional phrase, the preposition is on a slanted line beneath the word the phrase modifies. A horizontal line is connected to this slanted line and the object of the preposition is written on this horizontal line. Any modifiers to the object of the preposition are written on slanted lines beneath the object of the preposition.



Diagramming Prepositional Phrases *Read the page.*

Example:

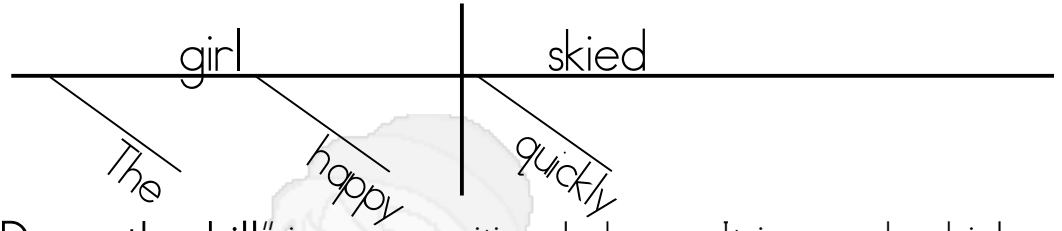
The happy girl skied quickly down the hill.

We begin by drawing the horizontal base line and the vertical line that divides the subject and predicate.

"**Girl**" is the subject of the sentence and "**skied**" is the predicate. These words are written on the horizontal base line. The subject is on the left of the vertical line and the predicate is on the right.

"**The**" and "**happy**" are adjectives that modify the noun girl. "**The**" and "**happy**" are written on slanted lines beneath the noun that they modify (girl).

"**Quickly**" is an adverb that modifies the verb "**skied**".
The word "**quickly**" is placed on a slanted line beneath the verb that it modifies.

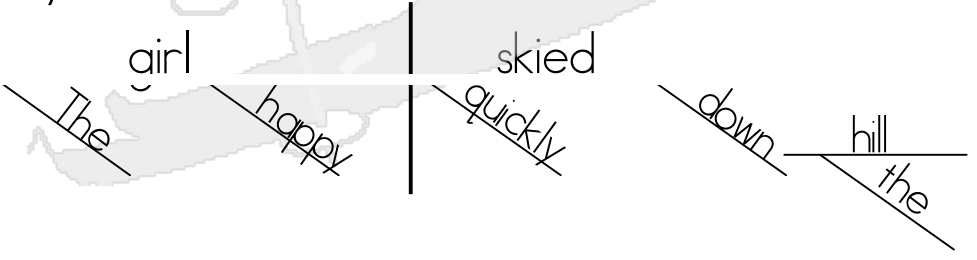


"**Down the hill**" is a prepositional phrase. It is an adverbial propositional phrase because it modifies the word "**skied**". Since it modifies the word "**skied**", the prepositional phrase is diagrammed beneath the word "**skied**".

In the phrase "**down the hill**", "**down**" is the preposition, "**hill**" is the object of the preposition, and "**the**" modifies "**hill**".

Draw a slanted line beneath the word "**skied**" and write "**down**" on that line. The object of the preposition goes on a horizontal line at the end of the preposition's slanted line. The adjective for the object of the preposition goes on a slanted line beneath the object of the preposition.

The finished diagram of the sentence "**The happy girl skied quickly down the hill.**" will look like this:



adverb prepositional phrase	subject and predicate
subject	diagrammed underneath noun
slanted line	diagramming
slanted line underneath subject	noun
vertical line separates	adjective and adverb
shows visual framework of a sentence	modifies verb
Adjective prepositional phrase	adverb
slanted line underneath predicate	adjective

Diagramming Prepositional Phrases

Draw a line to the correct answer.

adverb prepositional phrase	subject and predicate
subject	diagrammed underneath noun
slanted line	diagramming
slanted line underneath subject	noun
vertical line separates	adjective and adverb
shows visual framework of a sentence	modifies verb
Adjective prepositional phrase	adverb
