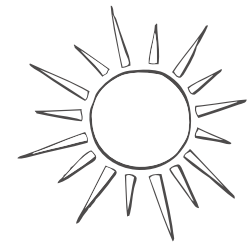
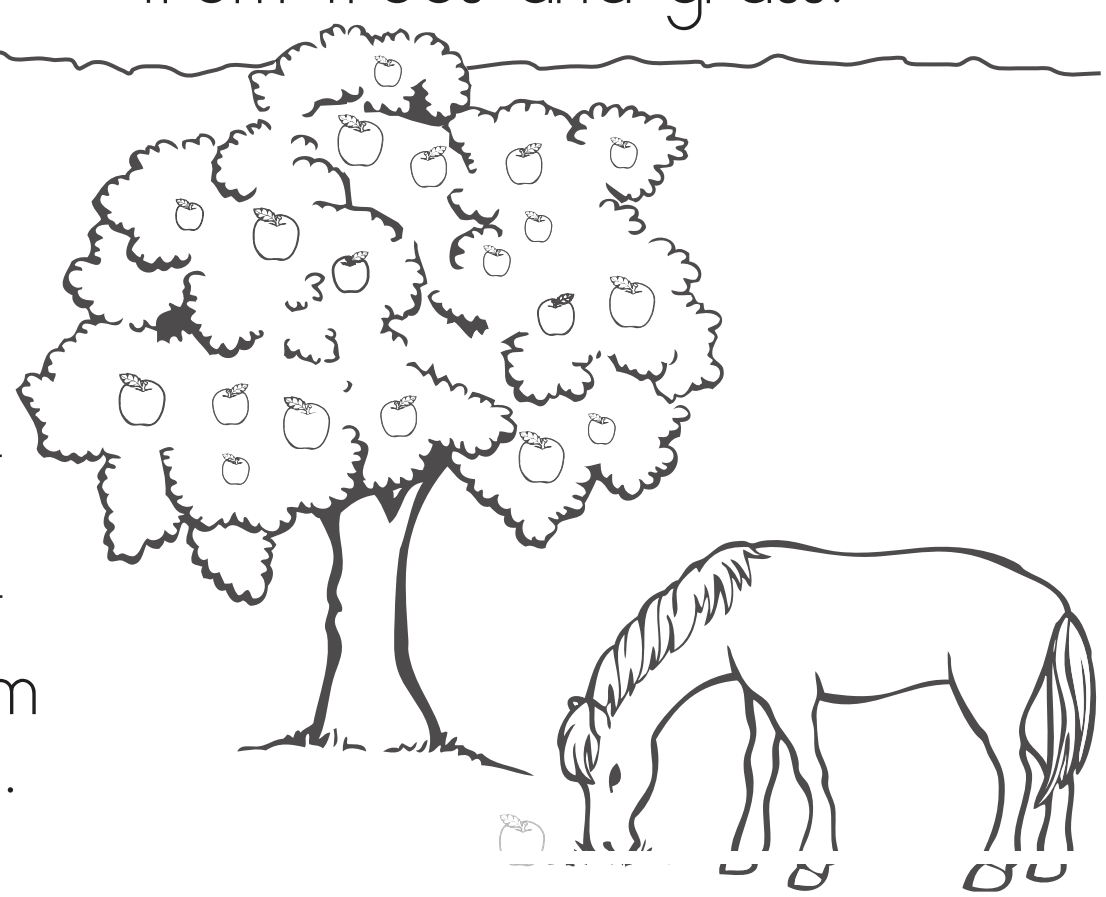
All living organisms depend on other living organisms.



Animals depend on plants for air, food and shelter.

Birds have homes in trees.

Horses eat fruit from trees and grass.



Squirrels store their food from trees in the ground.

Living Organisms

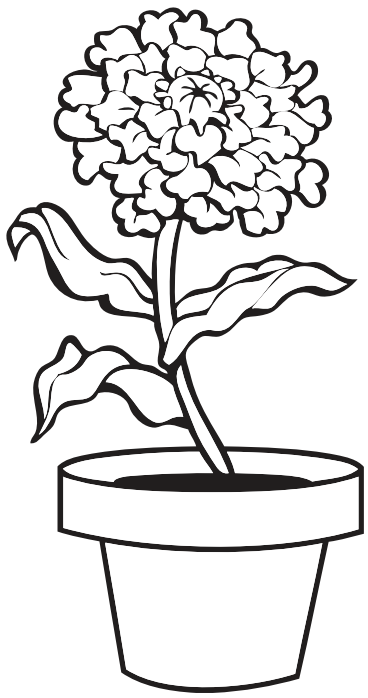
Read the information and trace the dotted words.

Animals need plants for oxygen.

Plants depend on animals for carbon dioxide.

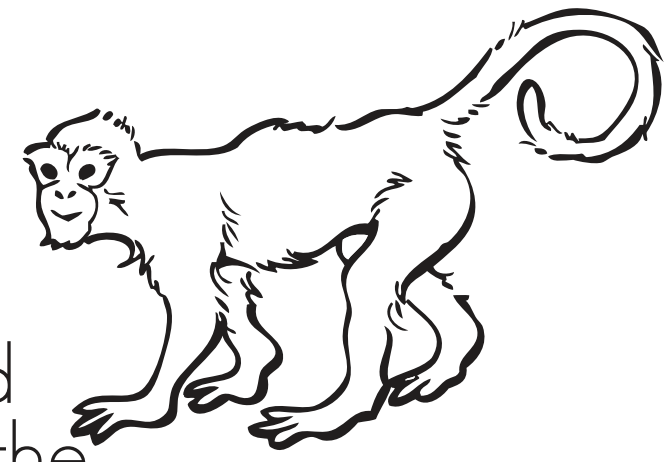
Plants need carbon dioxide to make food.

You can not see carbon dioxide, but it is a gas animals breathe out into the air.



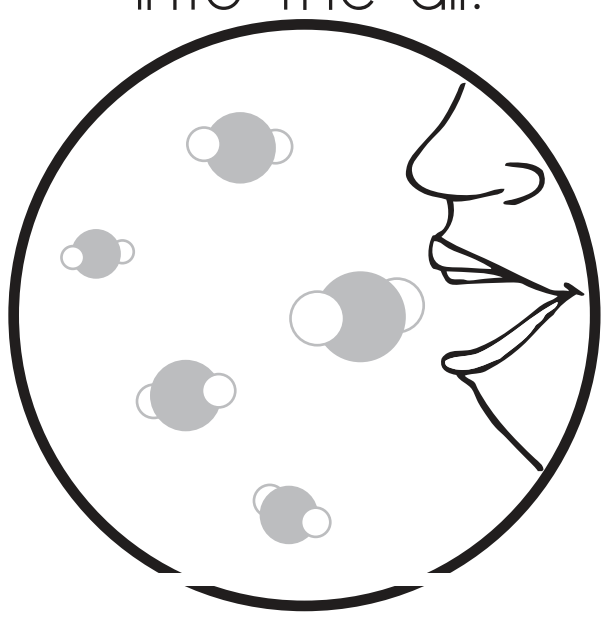
Plants release oxygen into the air.

Animals need oxygen to breathe.



Animals need oxygen to breathe.

You can not see oxygen, but it is a gas plants release into the air.



Animals release carbon dioxide when they breathe out.

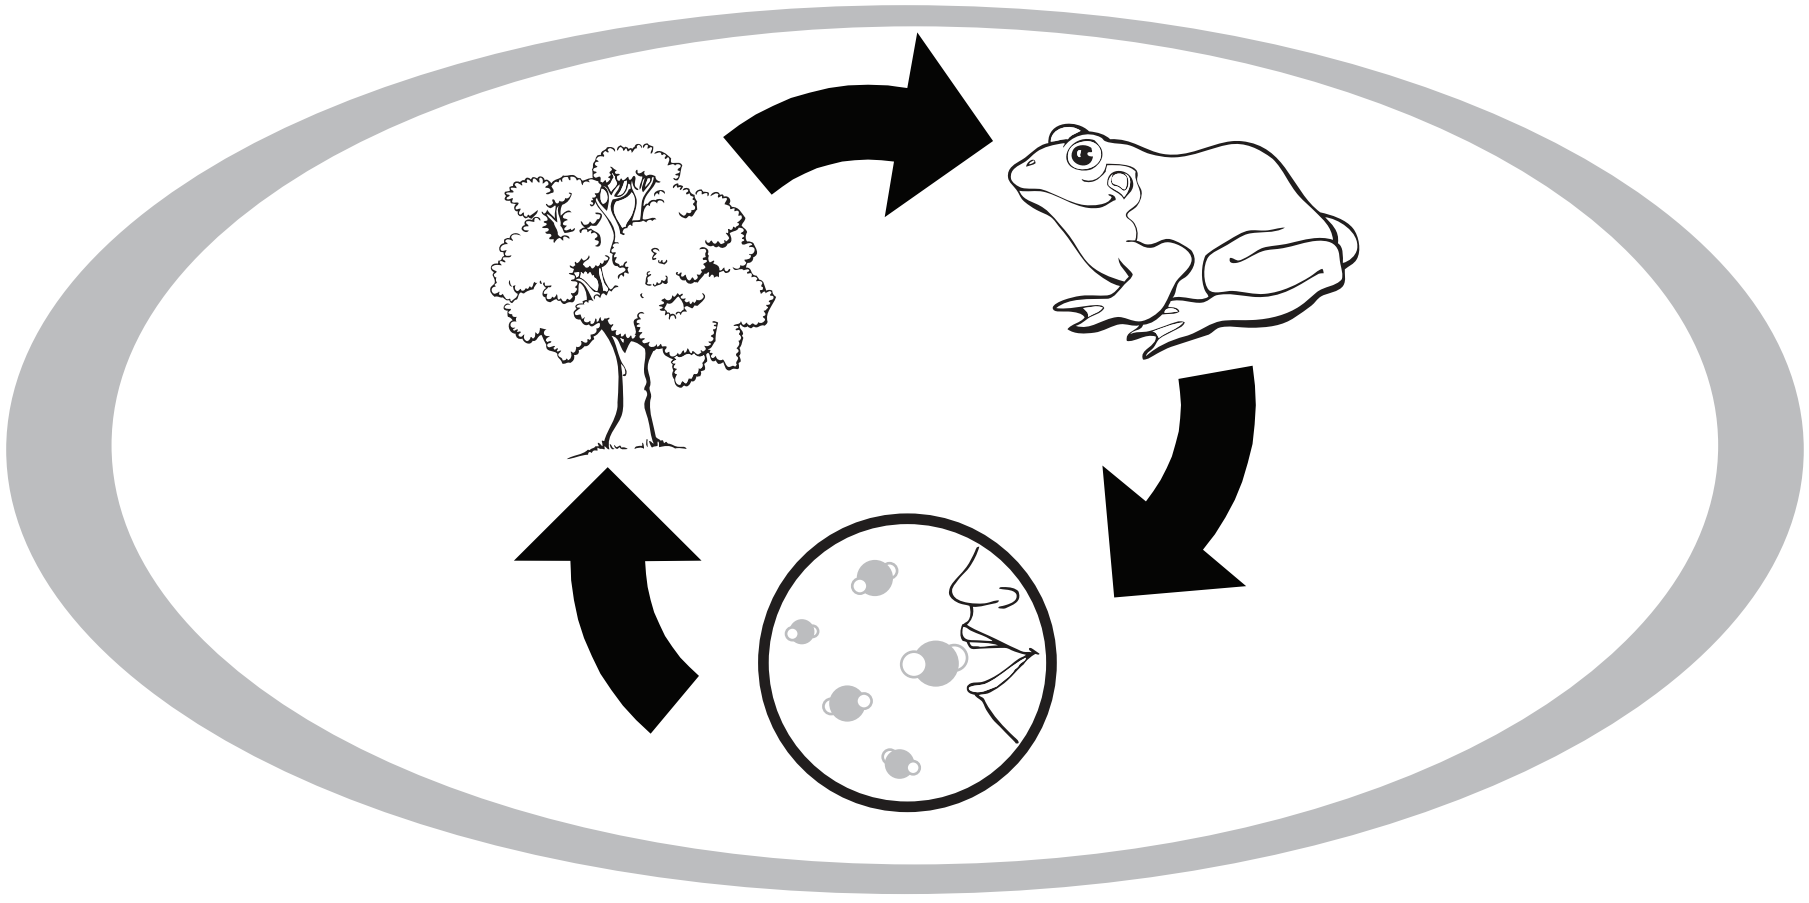
The plants need carbon dioxide to make food.

Living Organisms

Read the information and trace the dotted words and arrows.

Word Bank

oxygen	**gas**	**living organisms**	**plants**



1. All living organisms depend on other _____ _____ _____ _____.

2. Oxygen is released by _____.

3. Carbon dioxide is a _____ plants need to make food.

4. Animals need _____ so they can breathe.

Living Organisms

Read the information and fill in the blanks.

living organisms	**oxygen**
carbon dioxide	**plants**

All living organisms depend on other _____ _____ _____ for food, air, and shelter.

Oxygen is released by _____ _____.

Plants need _____ _____ to make food.

Animals need the _____ _____ that the plant releases.

Living Organisms

Use the Word Bank to fill in the blanks.

living organisms	**oxygen**
carbon dioxide	**plants**

All living organisms depend on other _____ _____ _____ for food, air, and shelter.

living organisms

Oxygen is released by _____.

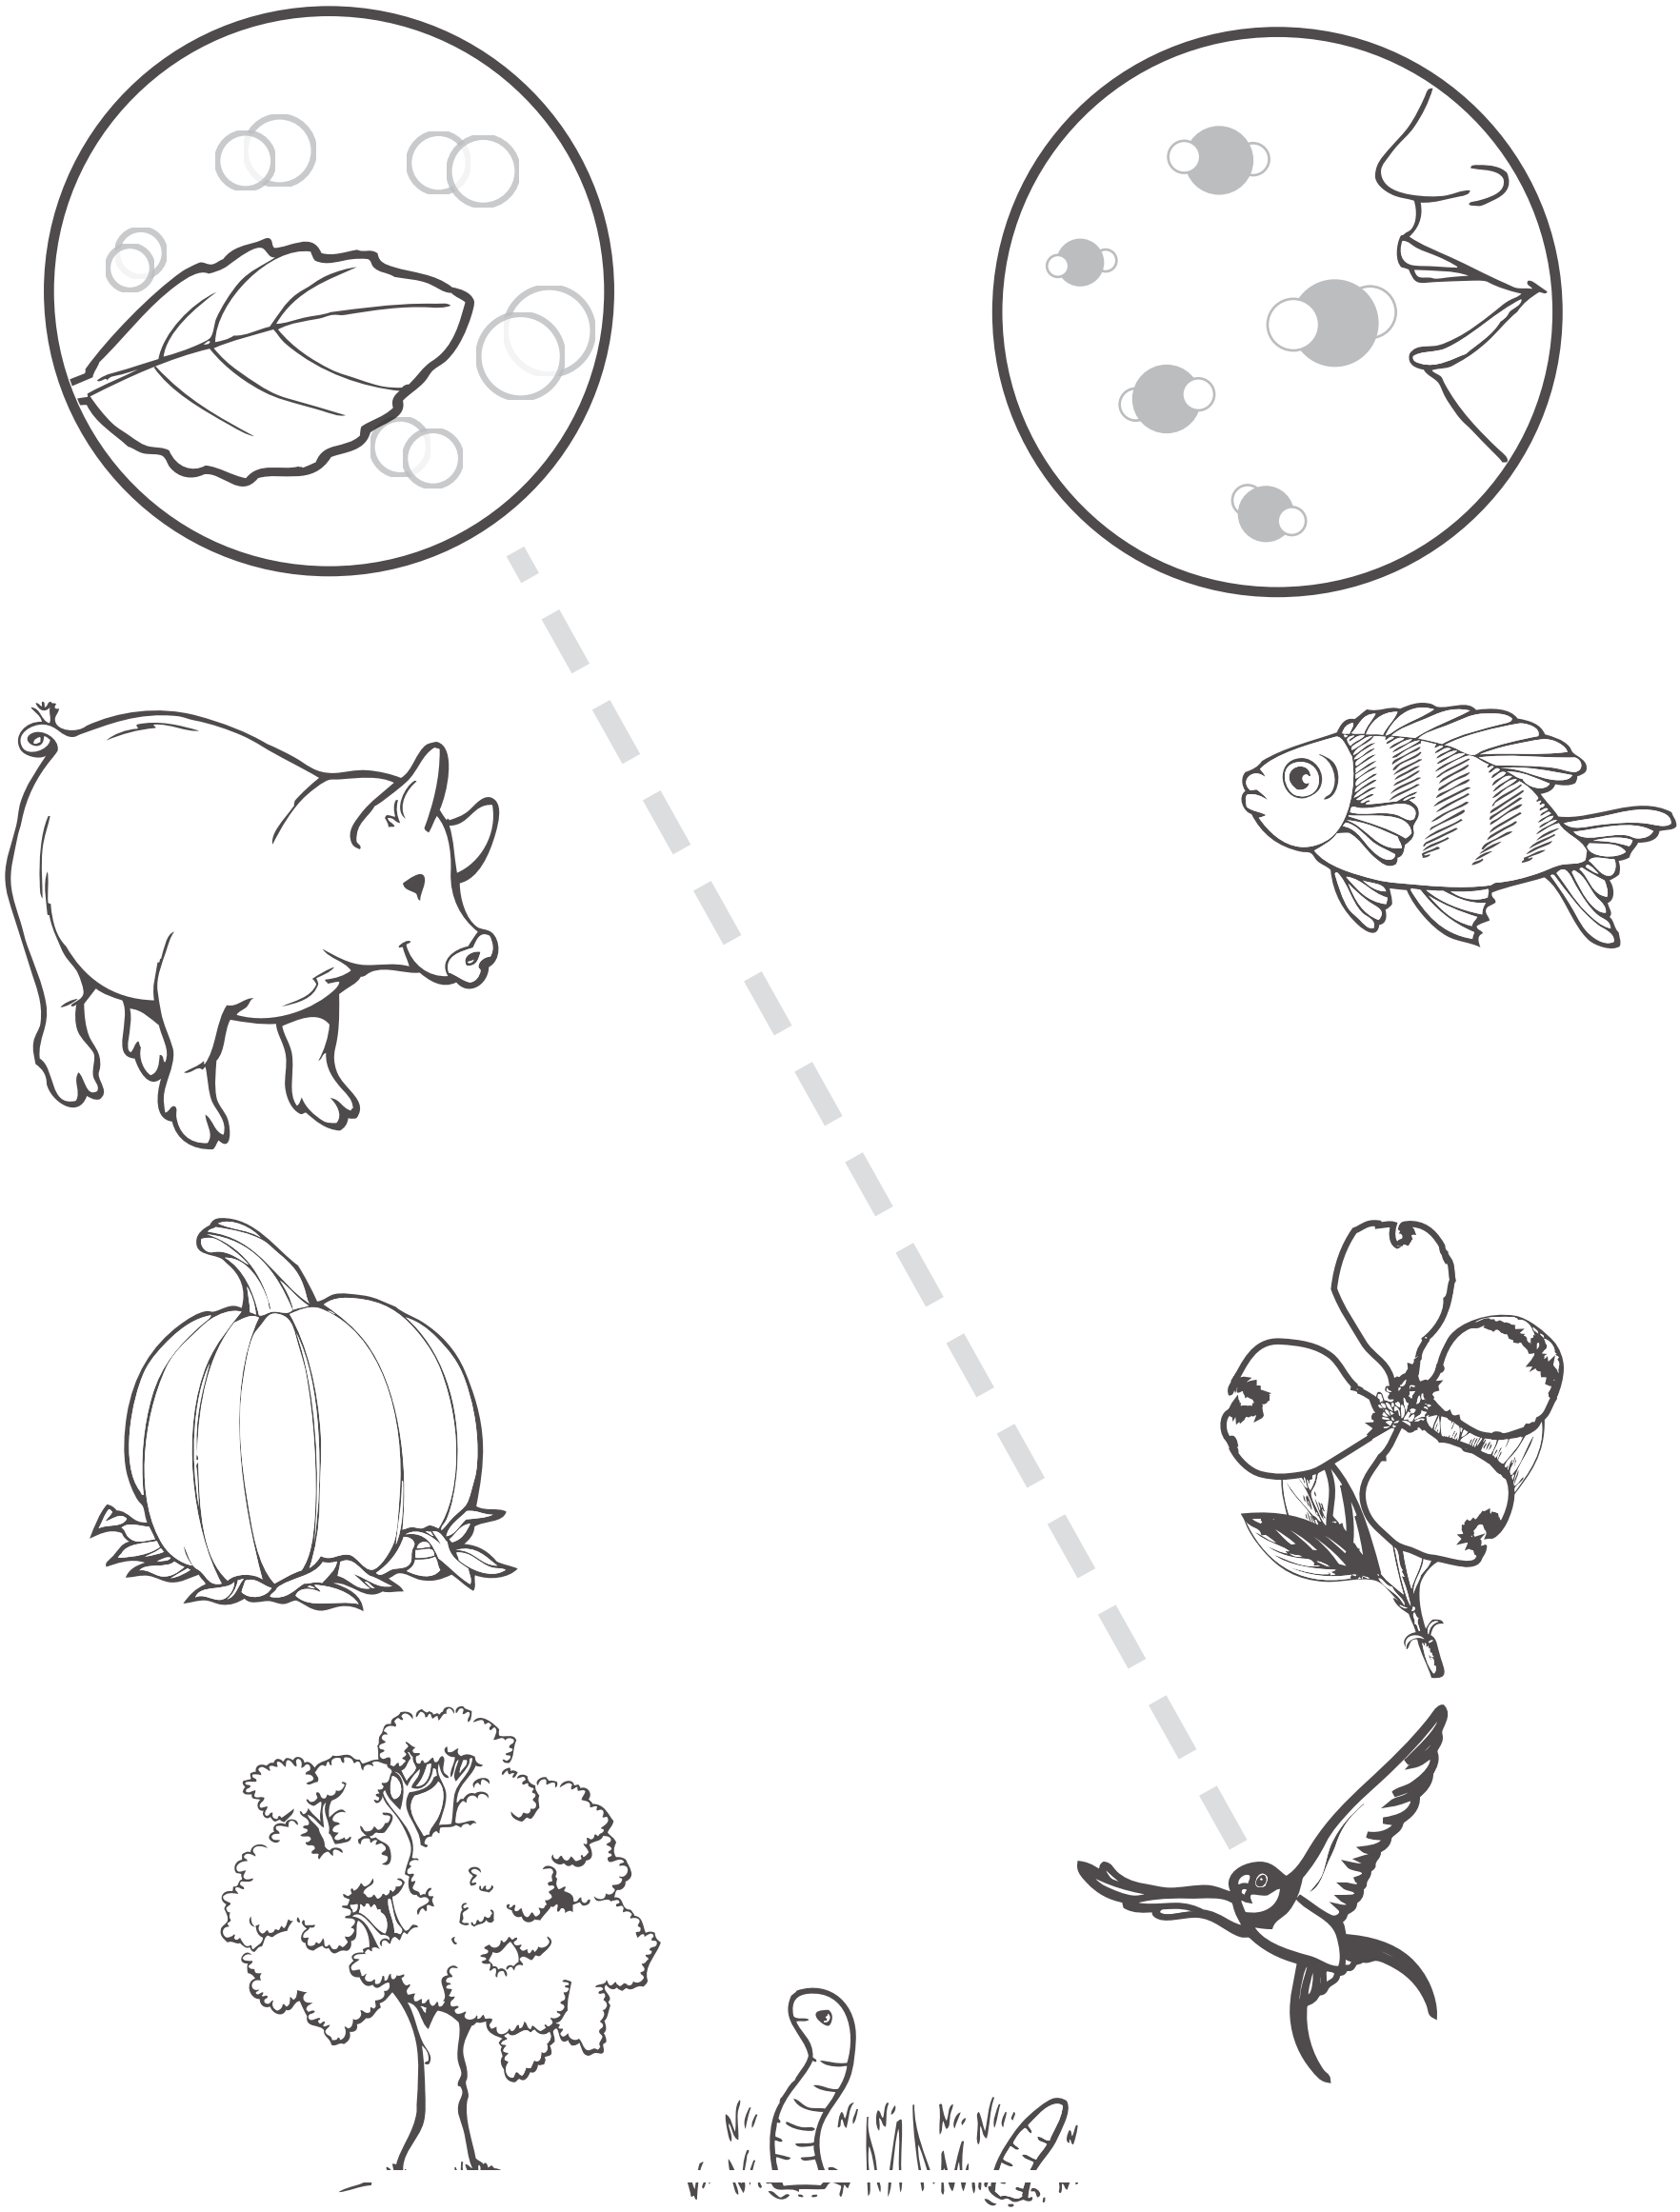
plants

Plants need _____ to make food.

carbon dioxide

Animals need the _____ that the plant releases.

oxygen

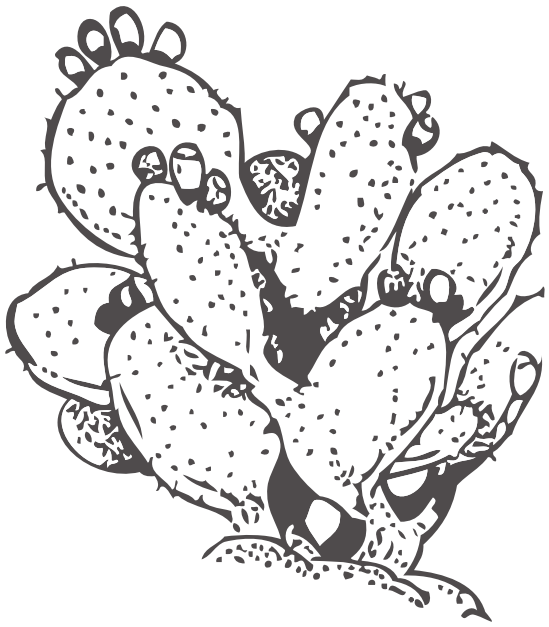


Living Organisms

Match the gases to the organisms that need it to survive.

Plants make their own food.

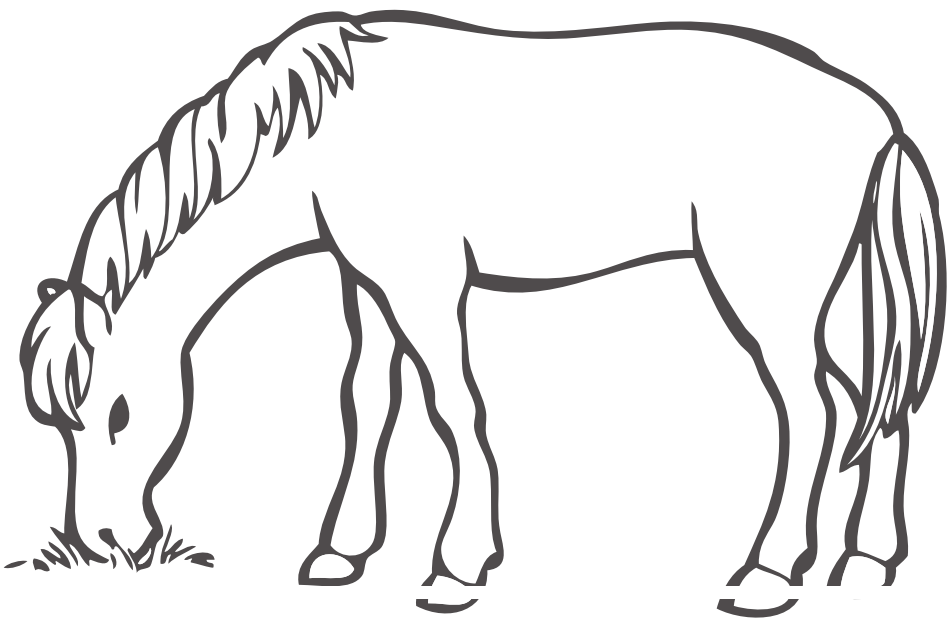
Plants are called producers.



Animals do not make food.

Animals are called consumers.

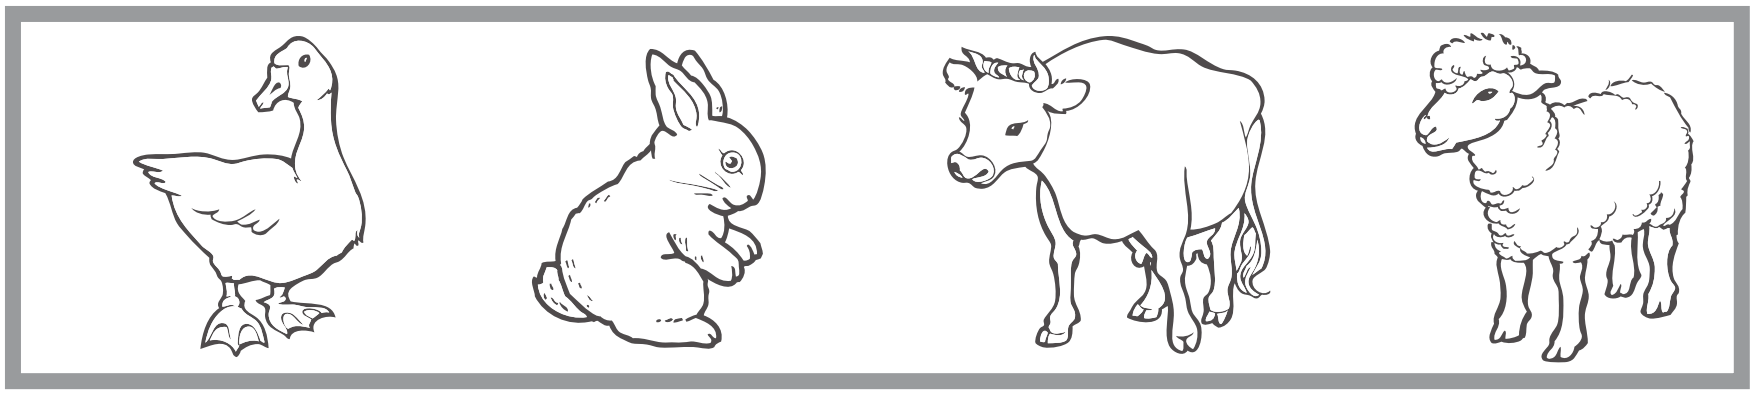
Animals have to eat plants or other animals for food.



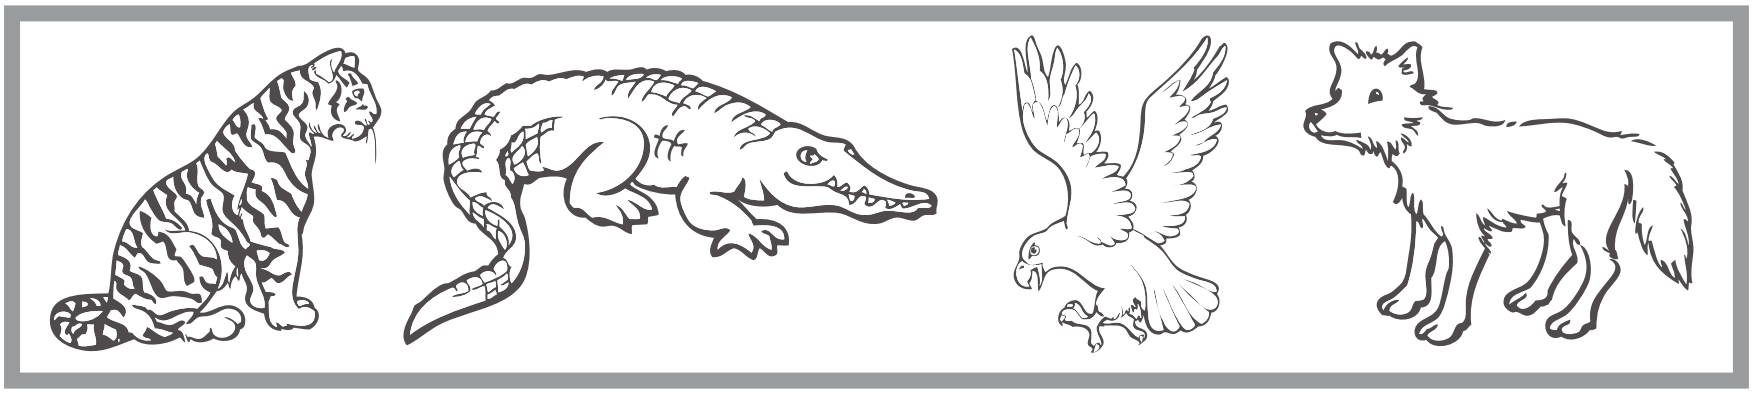
Producers and Consumers

Read the information and trace the dotted words.

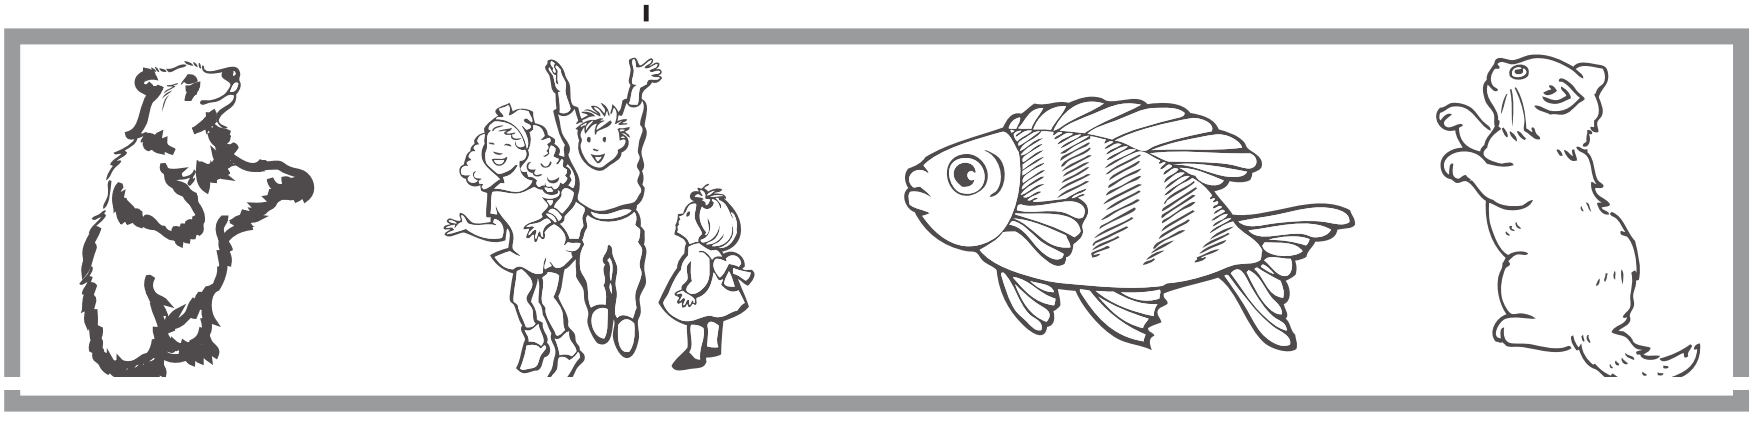
Herbivores are animals that eat only plants.



Carnivores are animals that eat other animals.



Omnivores are animals that eat both plants and animals.

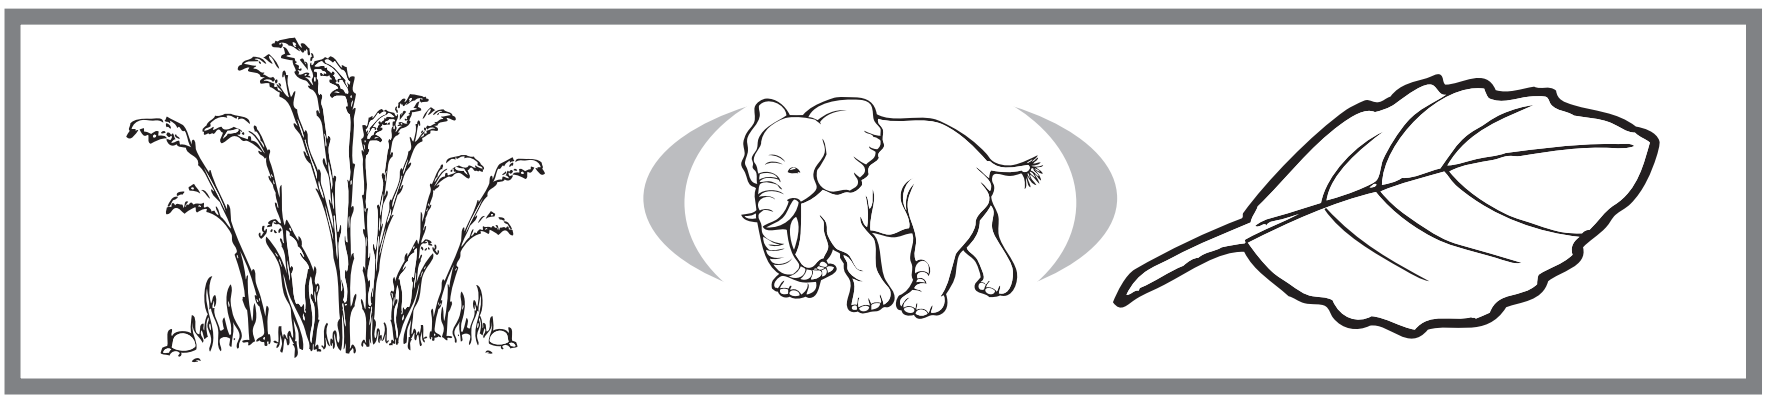


Producers and Consumers

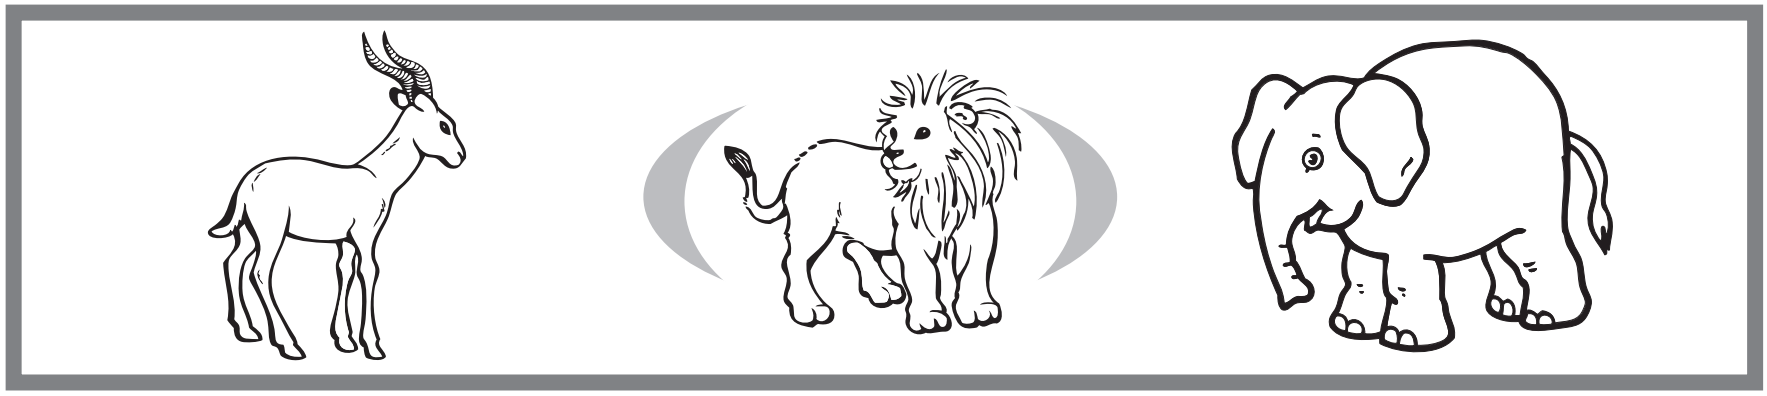
Read the information and trace the dotted words.

Herbivores are animals that eat only plants.

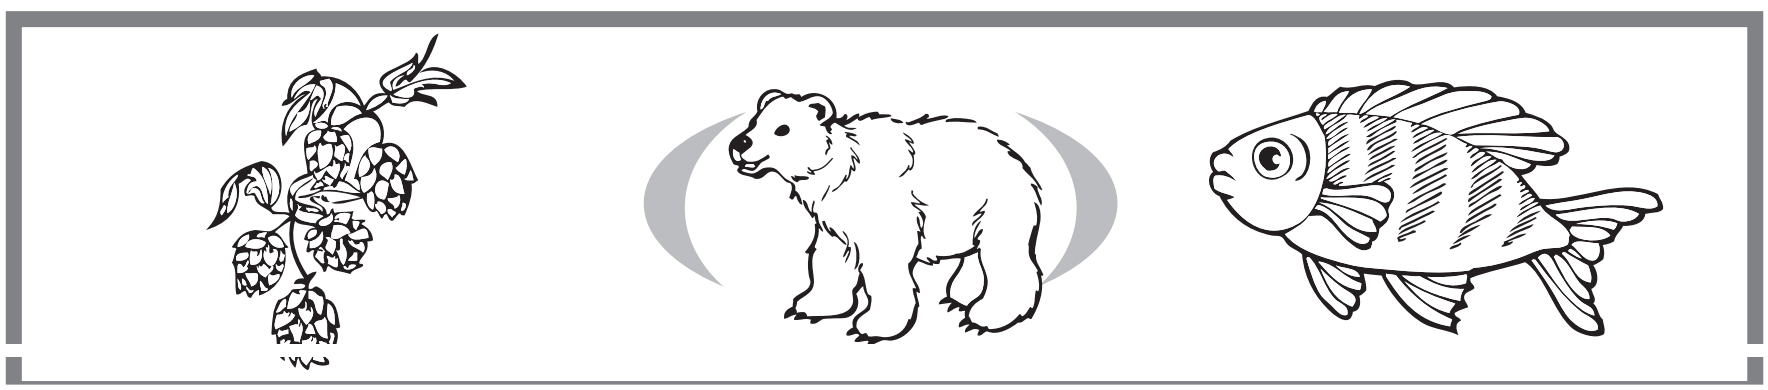
An elephant eats grass and leaves.



Carnivores are animals that eat other animals. A lion eats gazelles and other animals for meat.

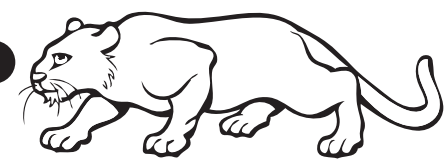


Omnivores are animals that eat both plants and animals. A bear eats berries, fruits, and fish.



Herbivores

eat plants.

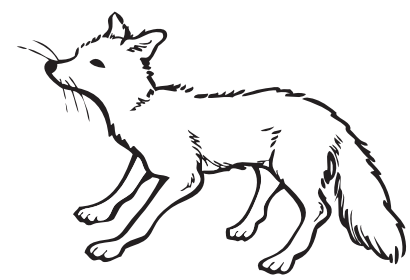


Carnivores

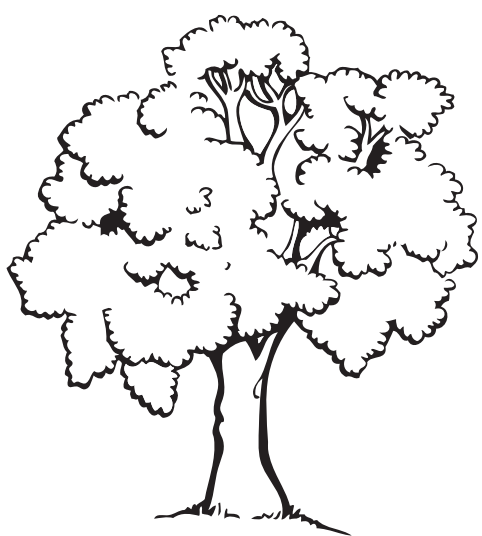
eat animals.

Omnivores

eat both plants and animals.

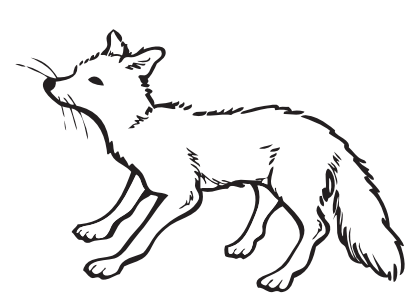


Producers

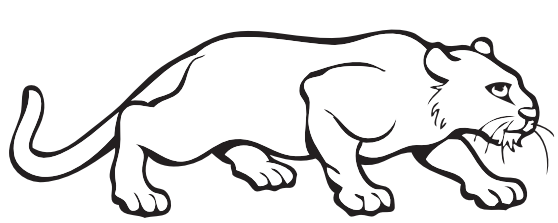


Herbivores

Omnivores



Carnivores



Producers and Consumers

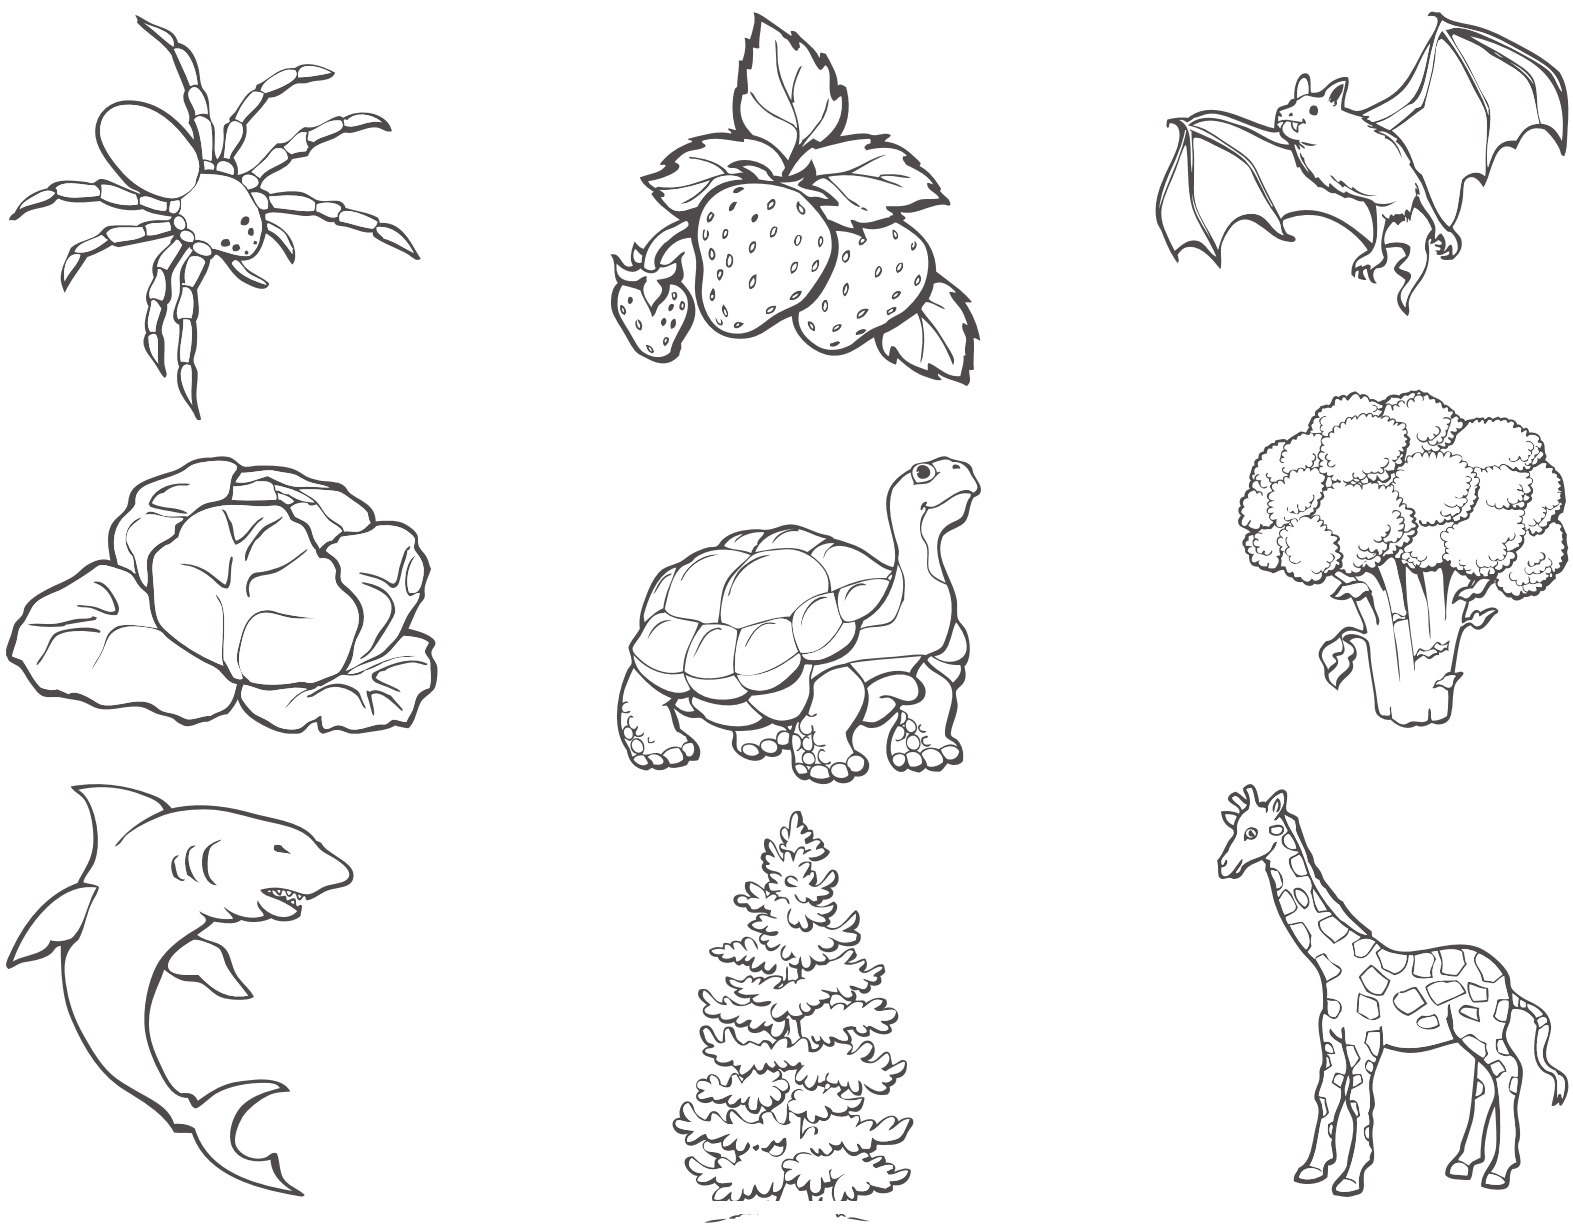
Match the animals to the type of consumer.

Herbivores

Carnivores

Omnivores

- plants and animals
- Eat animals
- Eat plants



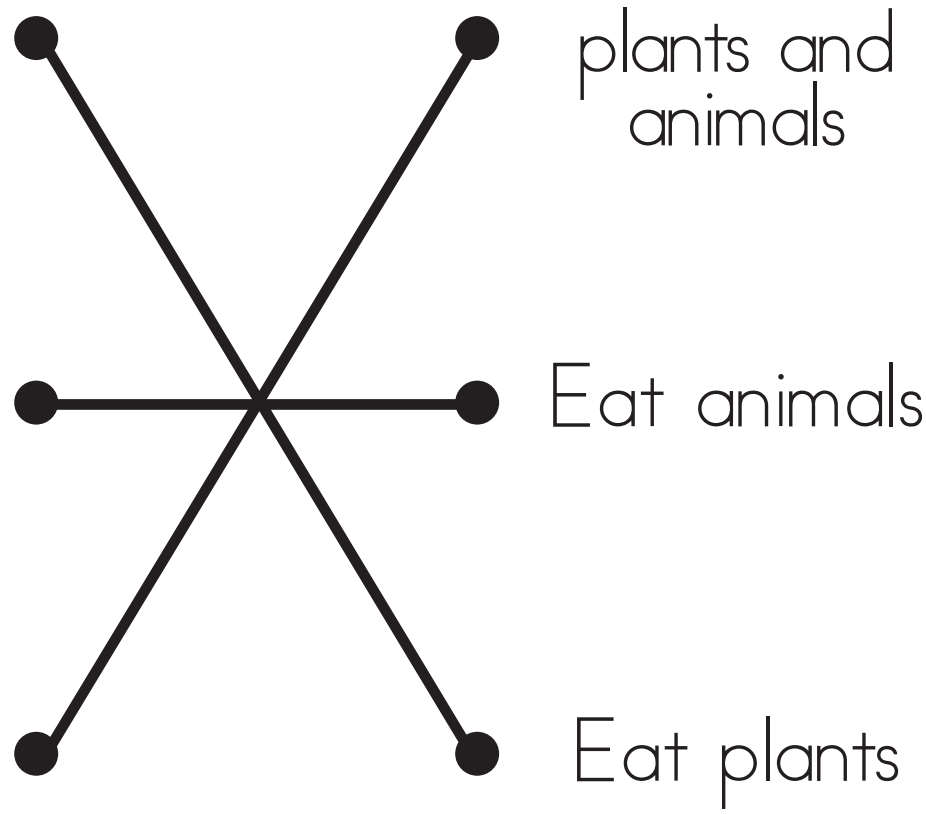
Producers and Consumers

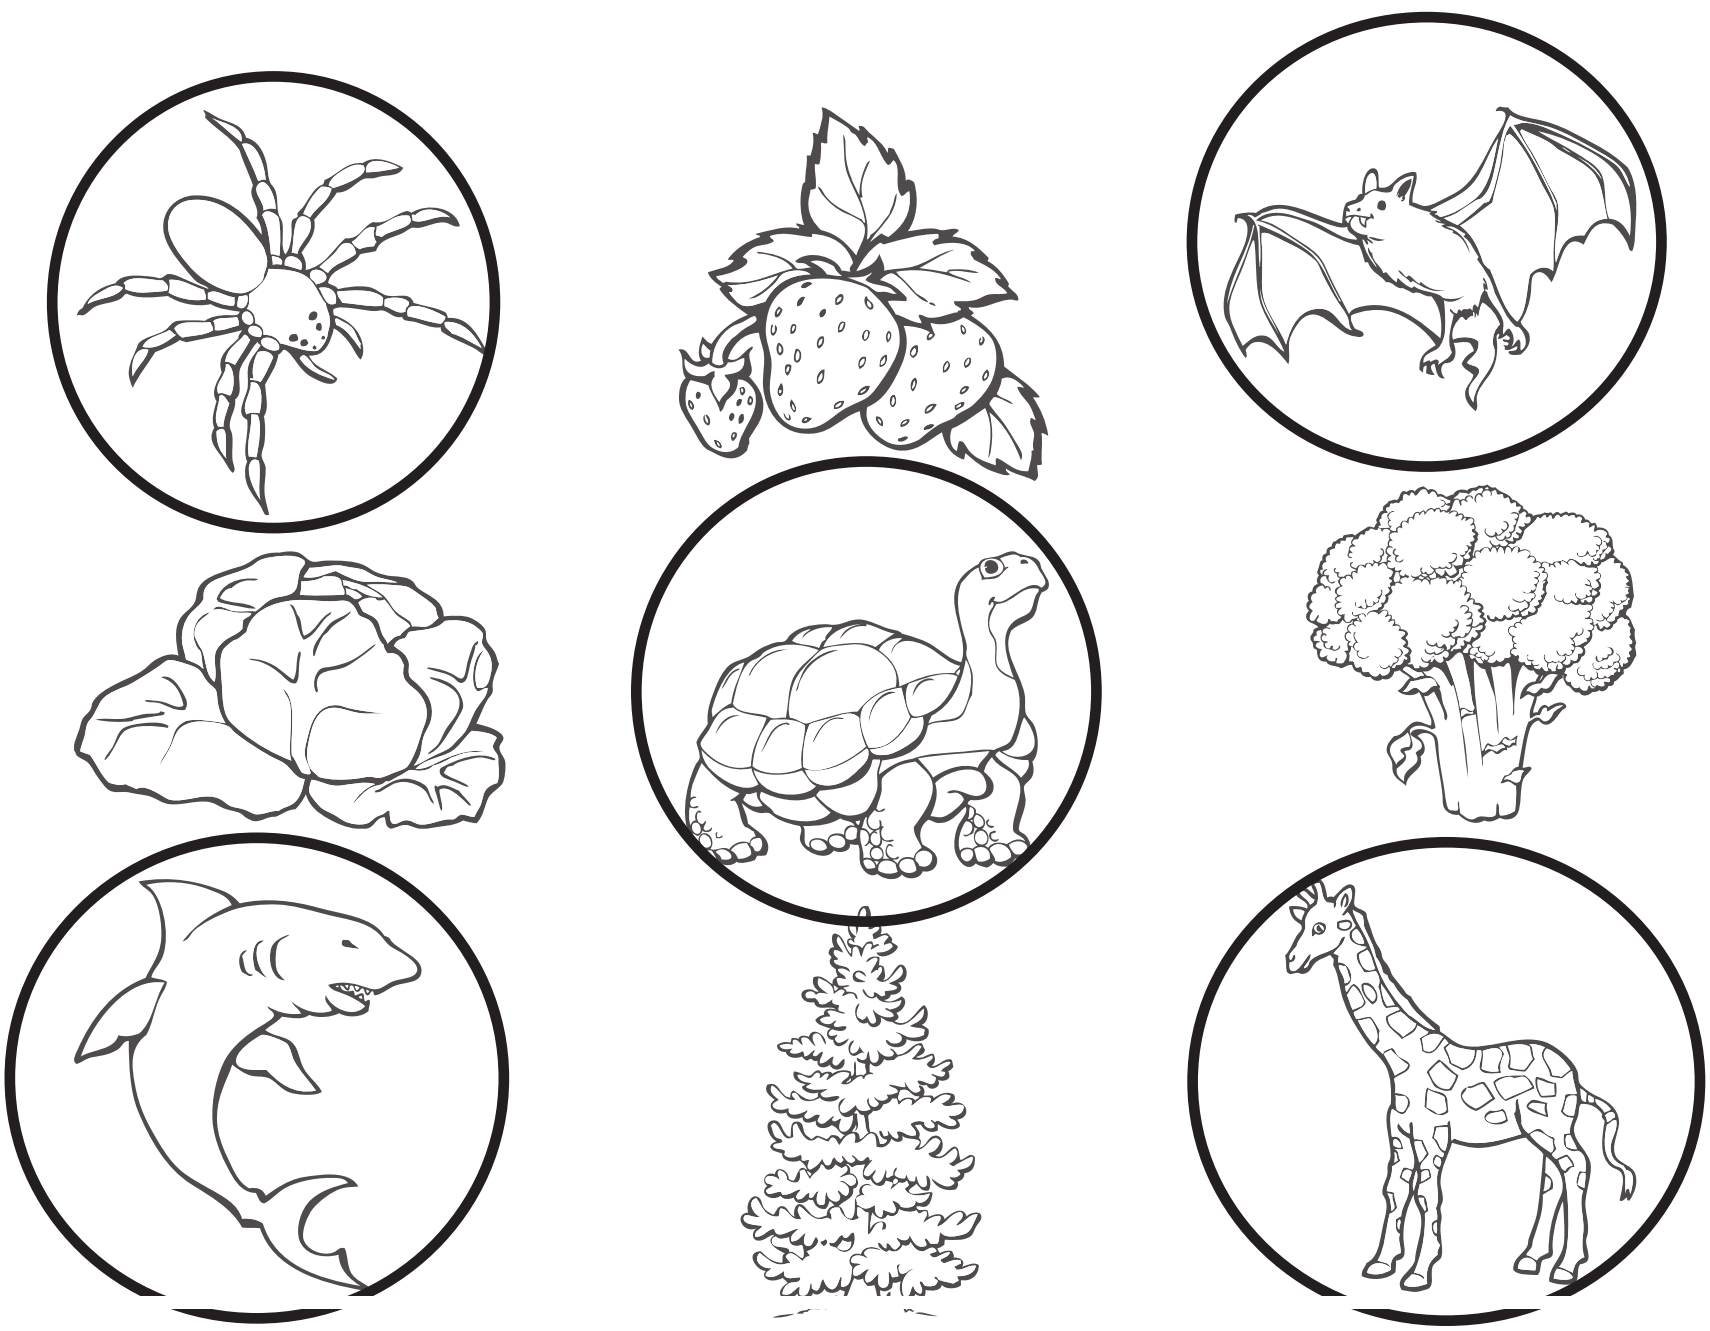
Match the types of consumers and circle them below.

Herbivores

Carnivores

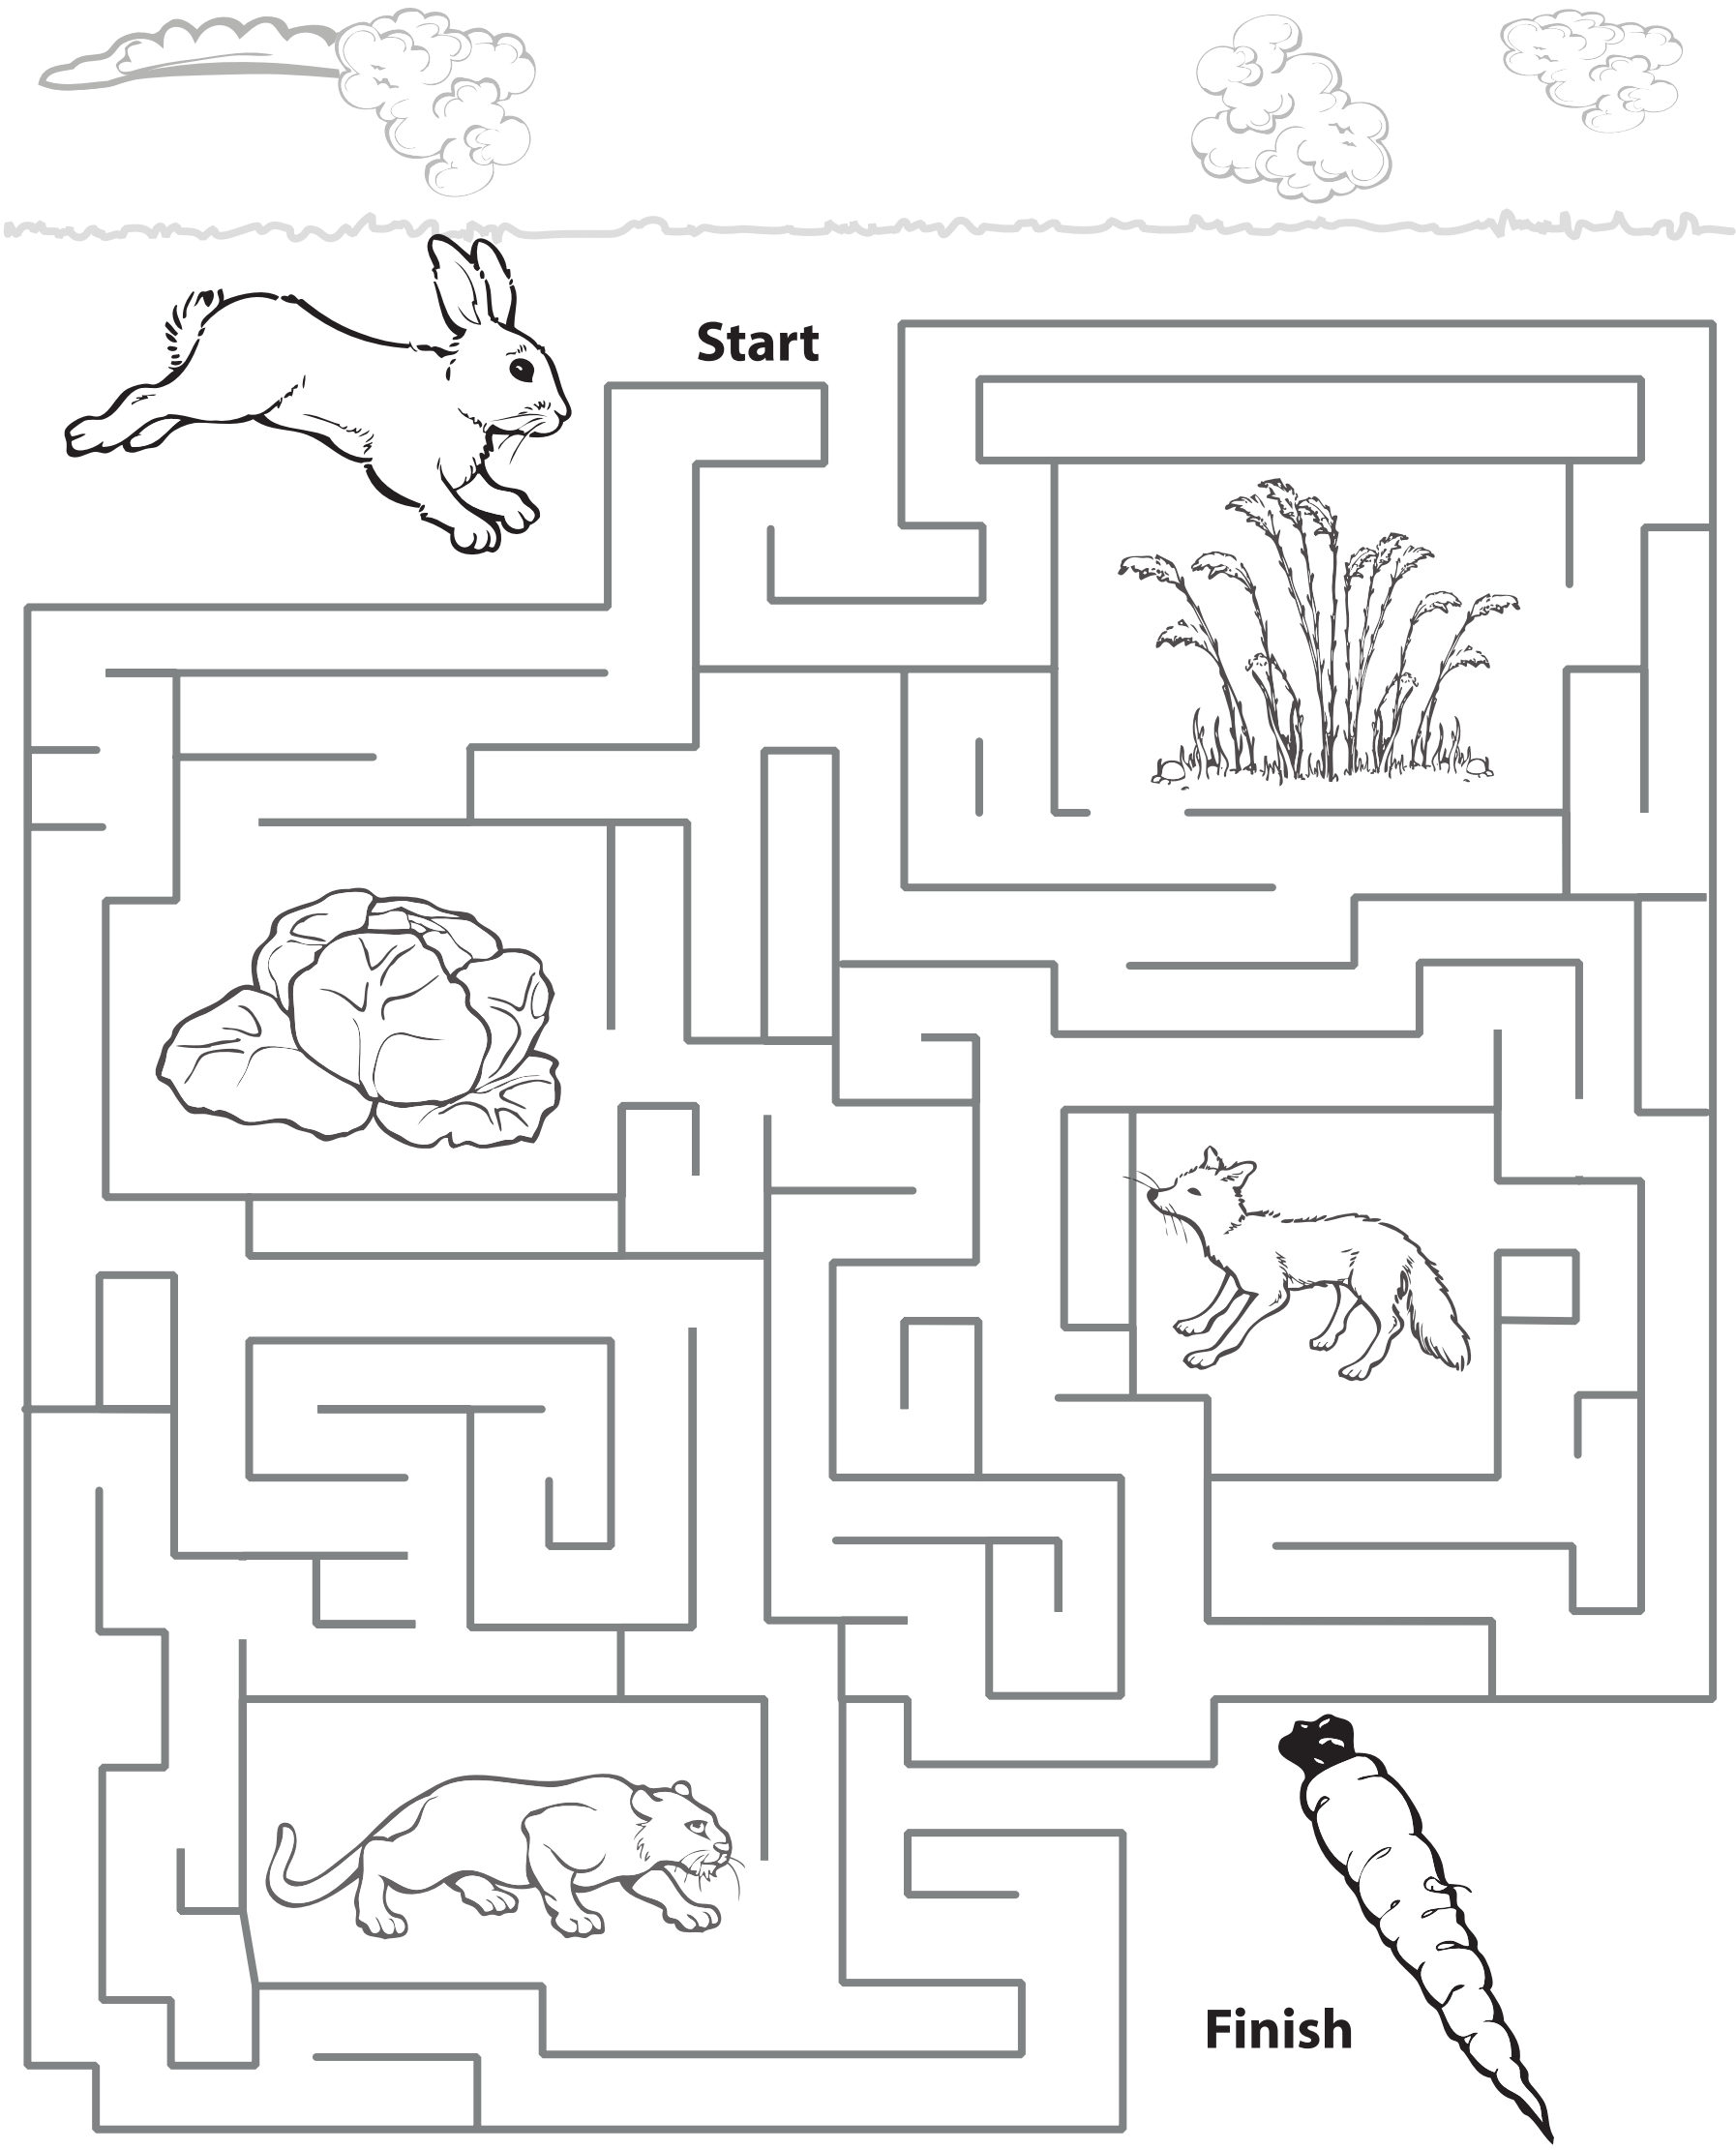
Omnivores





Producers and Consumers

Answers



Producers and Consumers

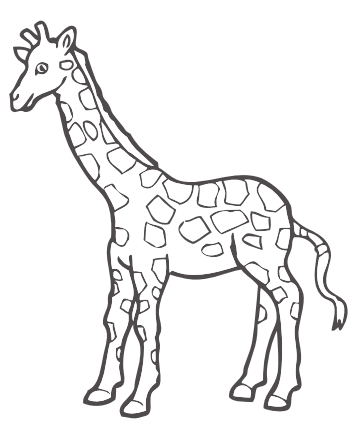
Help the rabbit find his way home by following the food he eats.

A food chain shows how living organisms interact with each other to get their food.

Food chains have producers and consumers in them.

tree ⇨

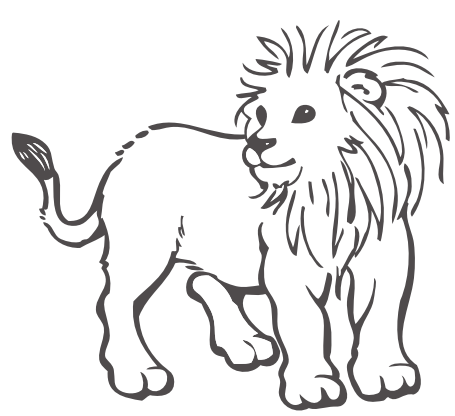
producer



giraffe ⇨

consumer

(Herbivores)



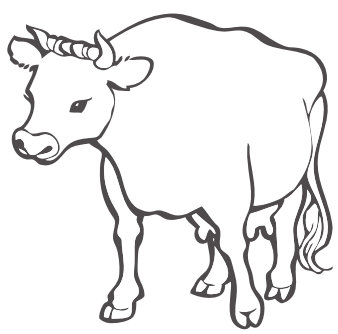
lion

consumer

(Carnivores)

grass ⇨

producer



cow ⇨

consumer

(Herbivores)

people

consumer

(Omnivores)

Food Chains

Read the information and trace the dotted words.

A food chain shows how living organisms interact _____ with each other to get their _____.

_____ _____ _____ _____ have producers and consumers in them.

Food chain first example:

grasshopper ⇨ tomato plant ⇨ bird

producer consumer consumer

Food chain second example:

Squirrel ⇨ bobcat ⇨ nuts

producer consumer consumer

Food Chains

Read the information and trace the dotted words and lines.

A food chain shows how living organisms interact _____ with each other to get their _____.

_____ _____

_____ _____ have producers and consumers in them.

---

eagle ● lizard ● lettuce ●

● producer ➡ ● consumer ➡ ● consumer

---

zebra ● grass ● lion ●

● producer ➡ ● herbivores ➡ ● carnivores

Food Chains

Fill in the blanks and match each animal to its spot.

A food chain shows how living organisms interact _____ with each other to get their _____ (food).

_____ _____ _____ _____ have producers and consumers in them.

(Food chains)

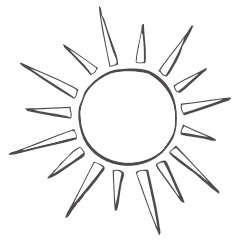
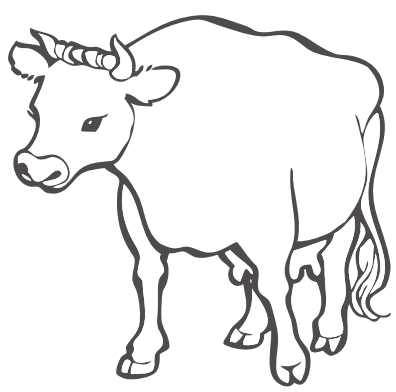
Animals use plants for shelter.



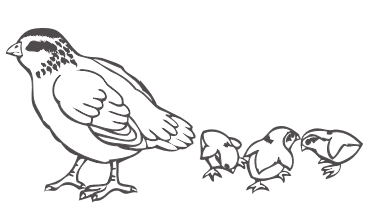
Shelter means a place to live or a home.

A shelter is used to protect animals from other animals and the weather.

Animals need to have a safe place to live.



Animals need to have a place that protects them from the weather when it is cold or hot.

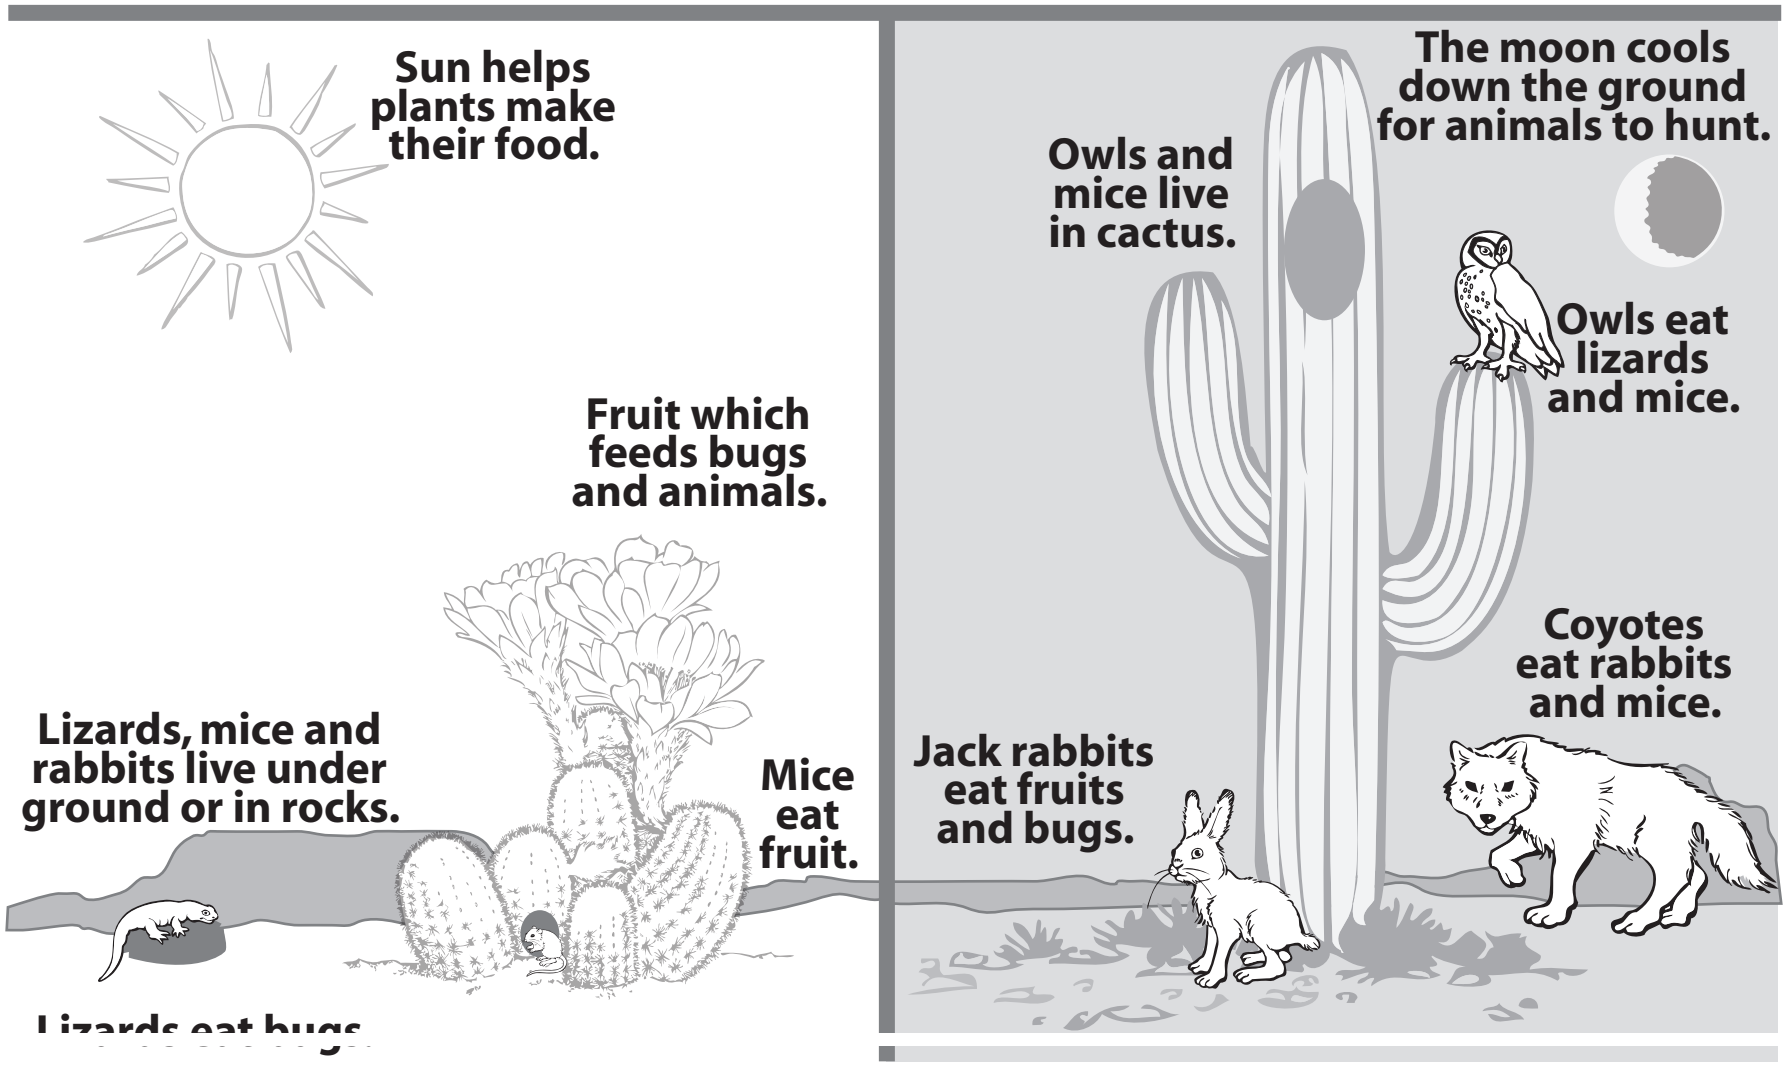


Shelter

Read the information and trace the dotted words.

The large Saguaro Cactus is home to many different animals. It offers shelter from the hot sun in the day and from the cool nights. The fruit from the Saguaro Cactus is also eaten by animals so it also provides food. In this picture you can see how one plant can provide shelter for many different animals.

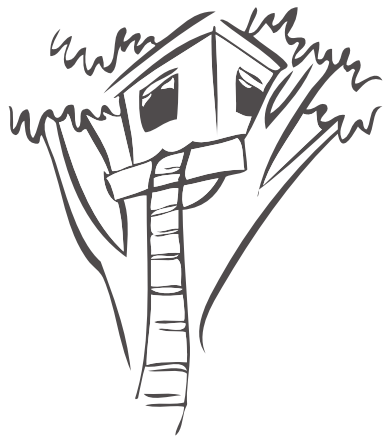
Animals need plants not only for food but for shelter.



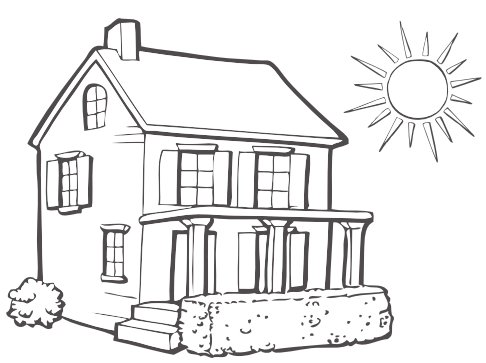
Shelter

Read the information and trace the dotted words.

People use plants for shelter.
We use trees to build our houses.



People who live in the jungle use trees or parts of a tree to build their shelter.



People use trees for shelter from the weather.

Shelter

Read the information and trace the dotted words.

Word Bank		
horse	shelter	snake
owl	person	bird

1. Animals depend on plants for _____.

2. barn

3. tall grass

4. cactus

5. tree

6. log cabin

Shelter

Trace over the lines that connect the shelter to the animal and fill in the blanks.

1. Animals depend on plants for _____

2. • • barn

3.  • • tree

4. • • cactus

5. • • log cabin

Shelter

Fill in the blanks and match the animal to its shelter.

1. Animals depend on plants for _____

shelter

2.

3. 
barn

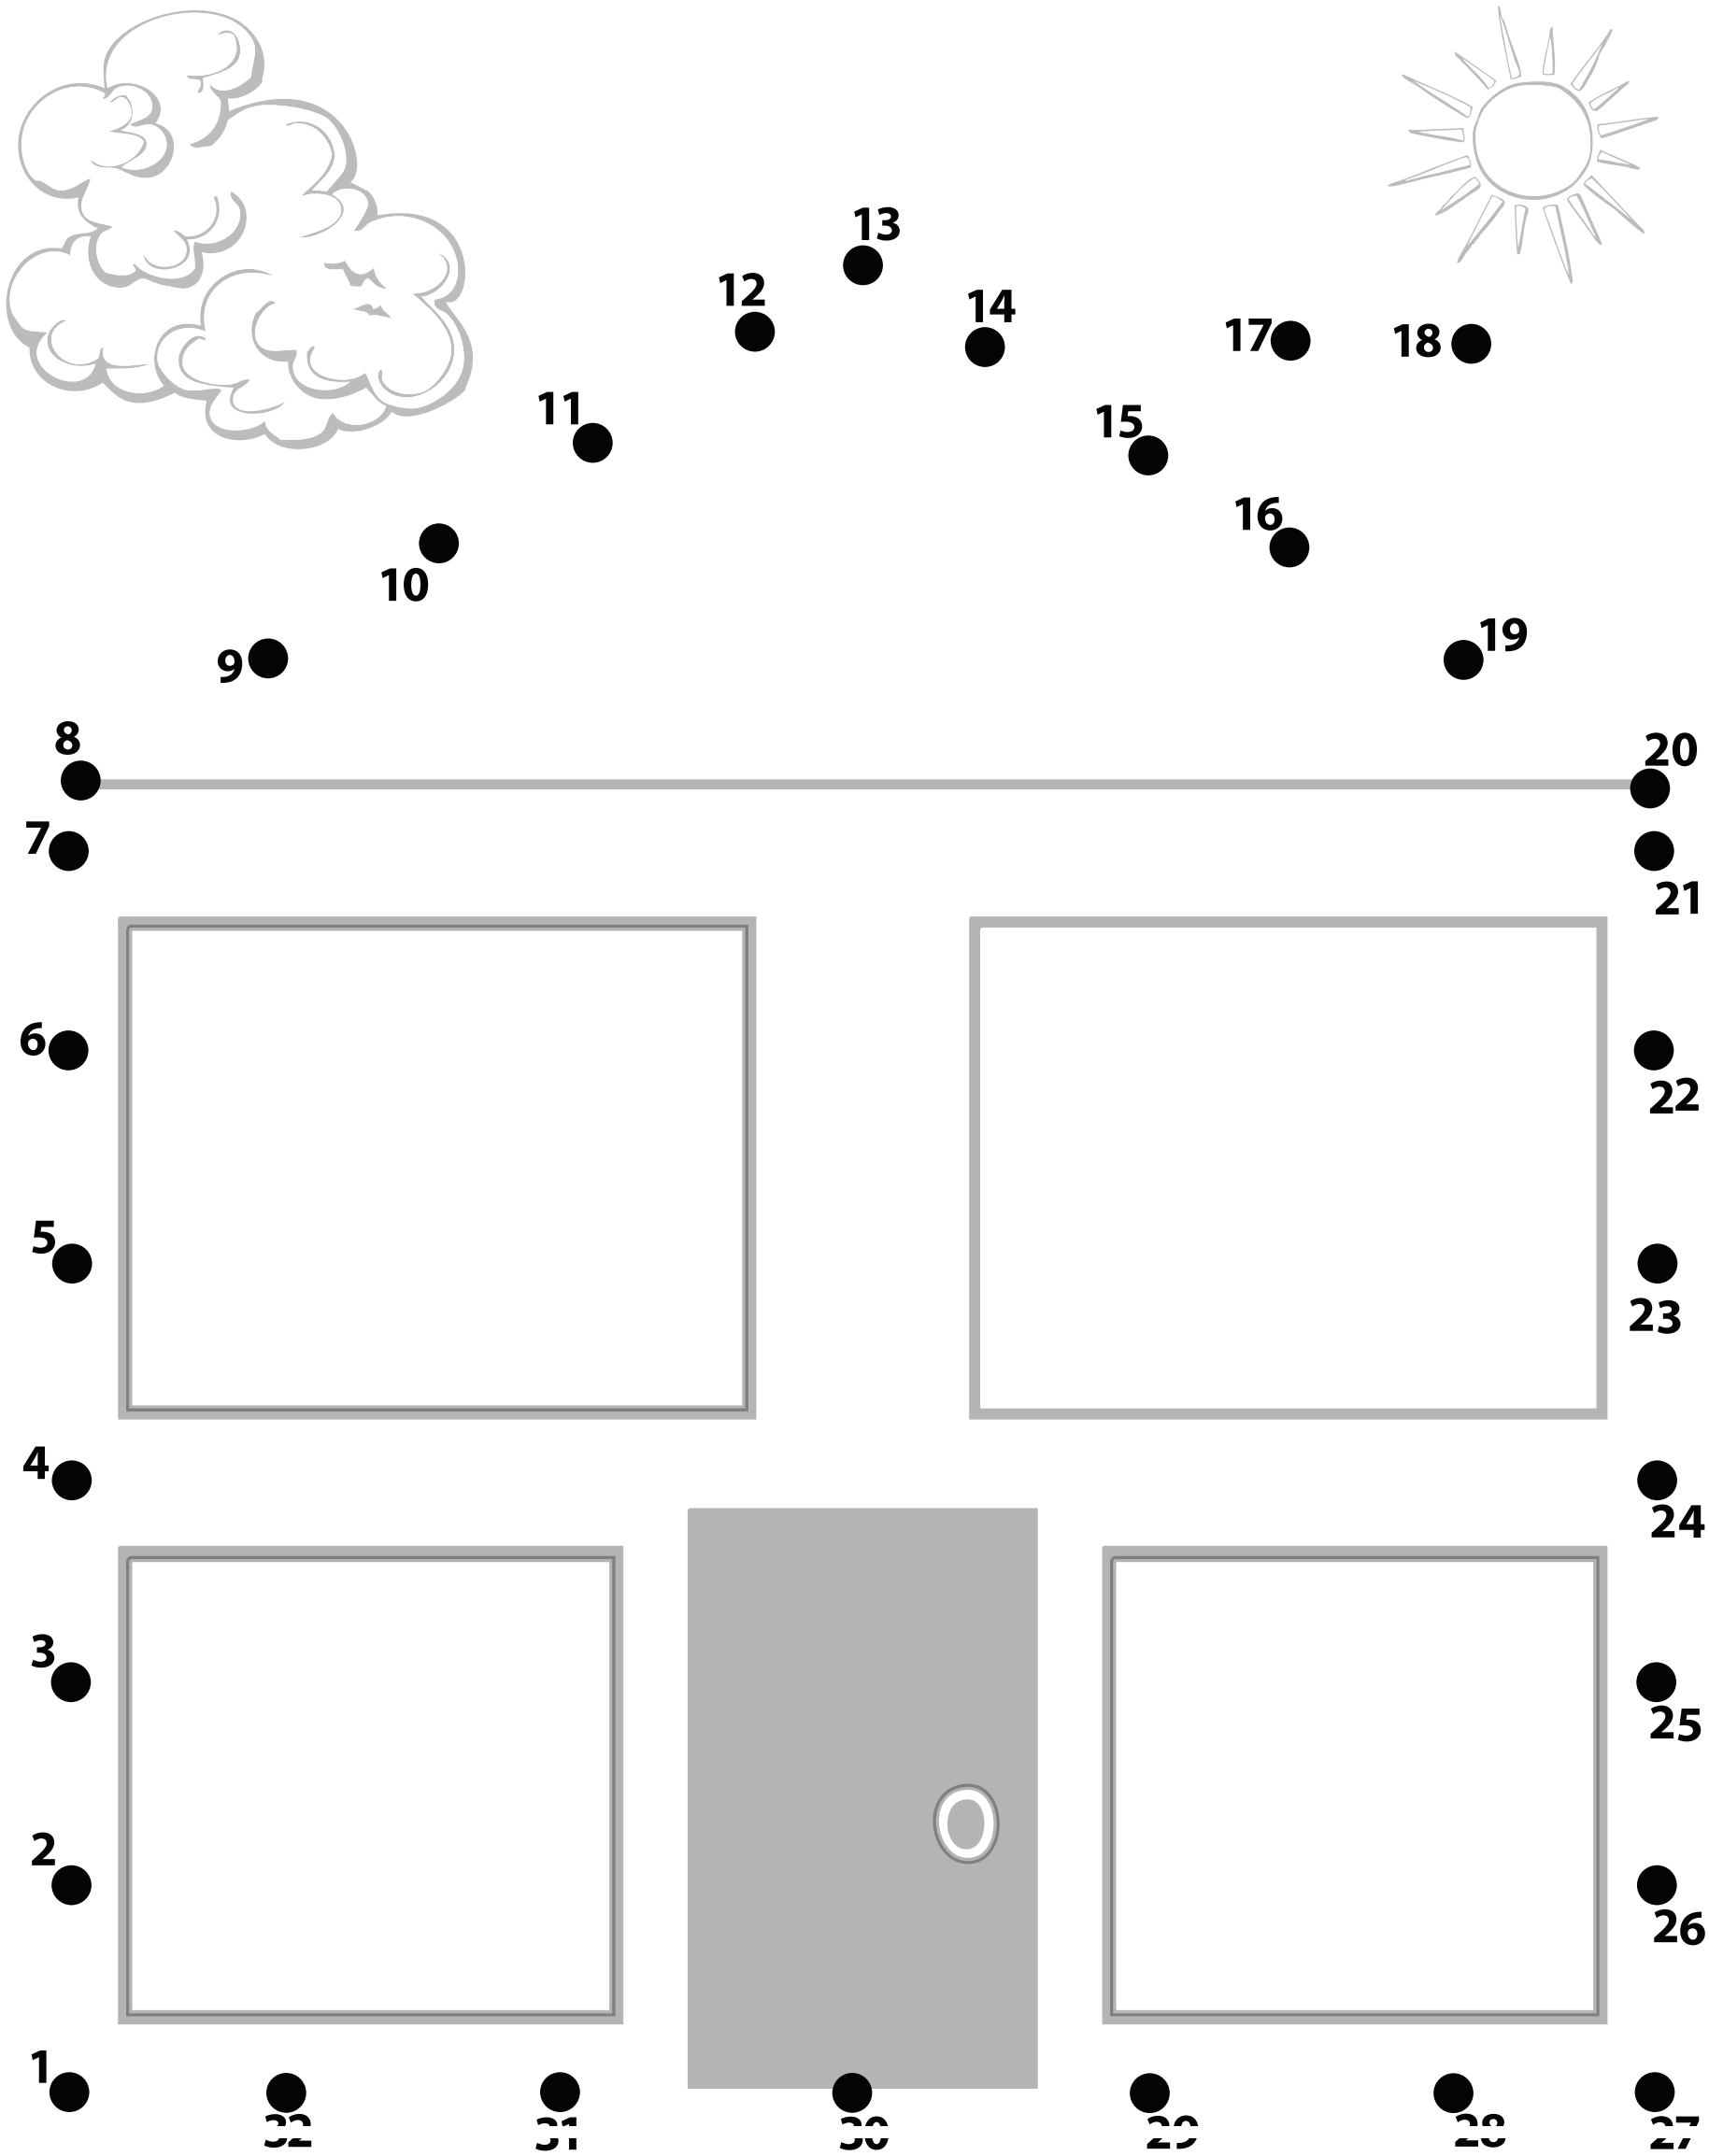
tree

4.

5.

cactus

log cabin

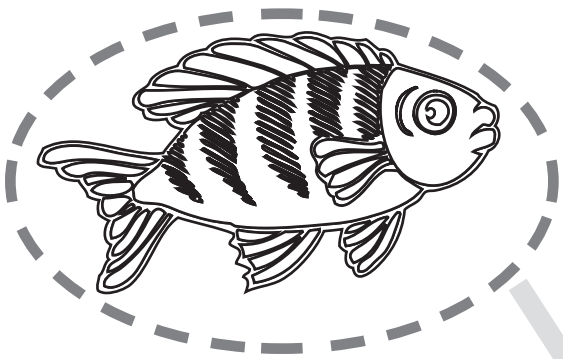


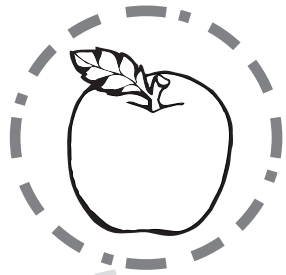
Shelter

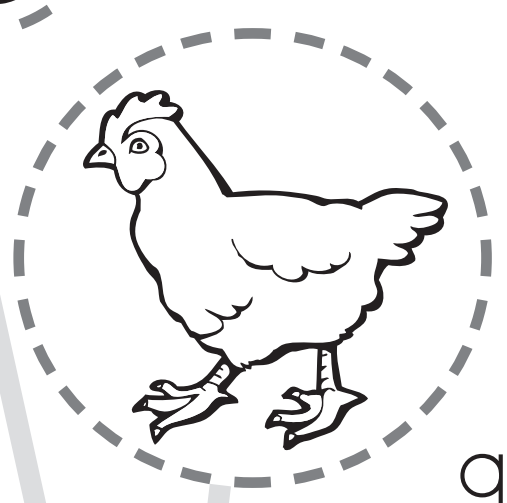
Complete the dot-to-dot.

Animals depend on other living organisms.

People depend on animals and plants.

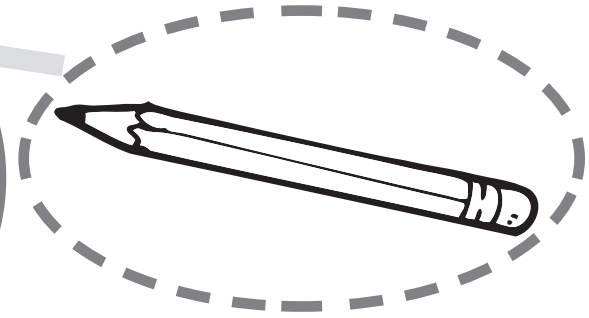






People need plants for food and to give us oxygen.

People enjoy having plants, flowers, and animals for comfort.



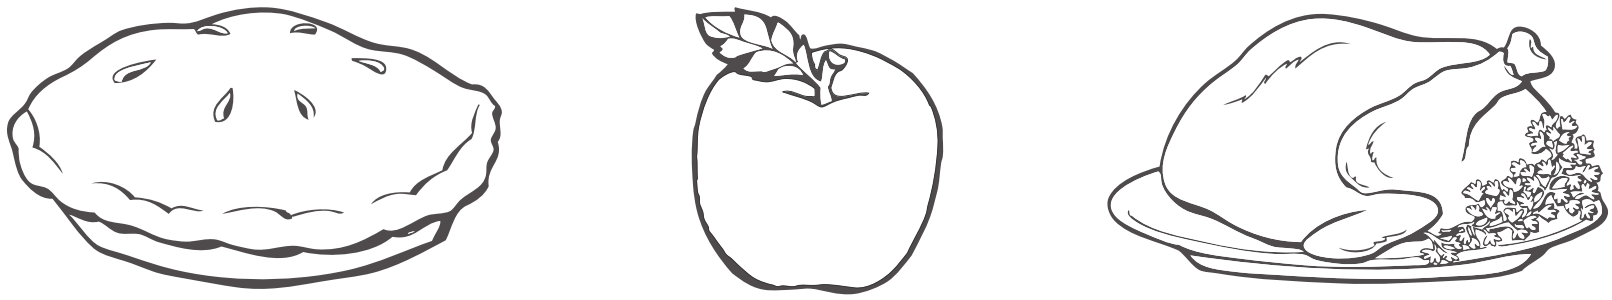
People enjoy planting flowers and receiving flowers.

People also enjoy having animals as pets.

People and Nature

Read the information and trace the dotted words and lines.

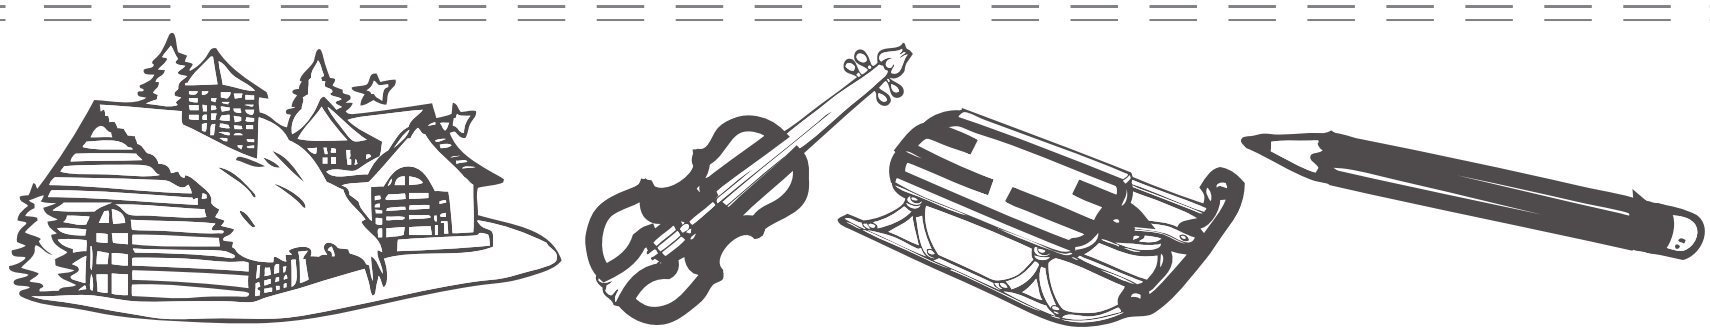
People need animals and plants to eat.



People plant seeds or plants to grow food.

People plant flowers, trees, and plants to make the outside of their homes pretty.

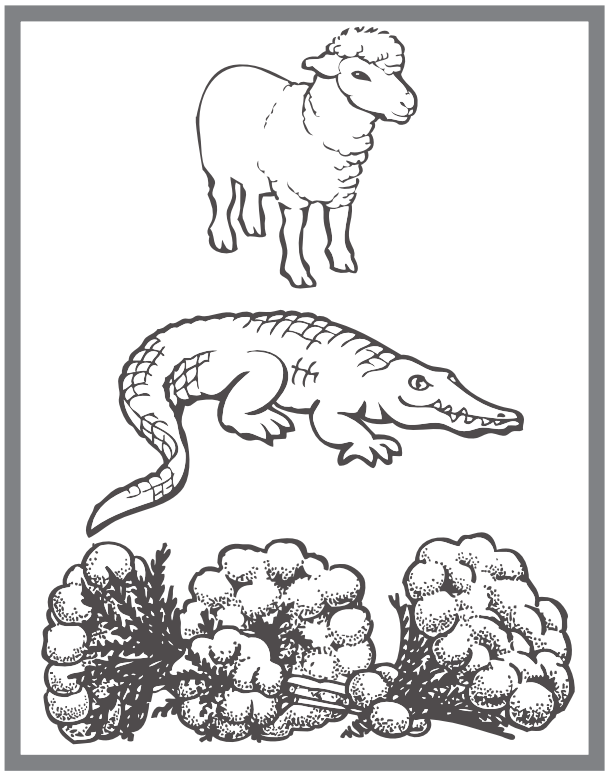
People need trees so they can use the wood to build wood products.



People and Nature

Read the information and trace the dotted words.

People use parts of animals and plants for clothing.



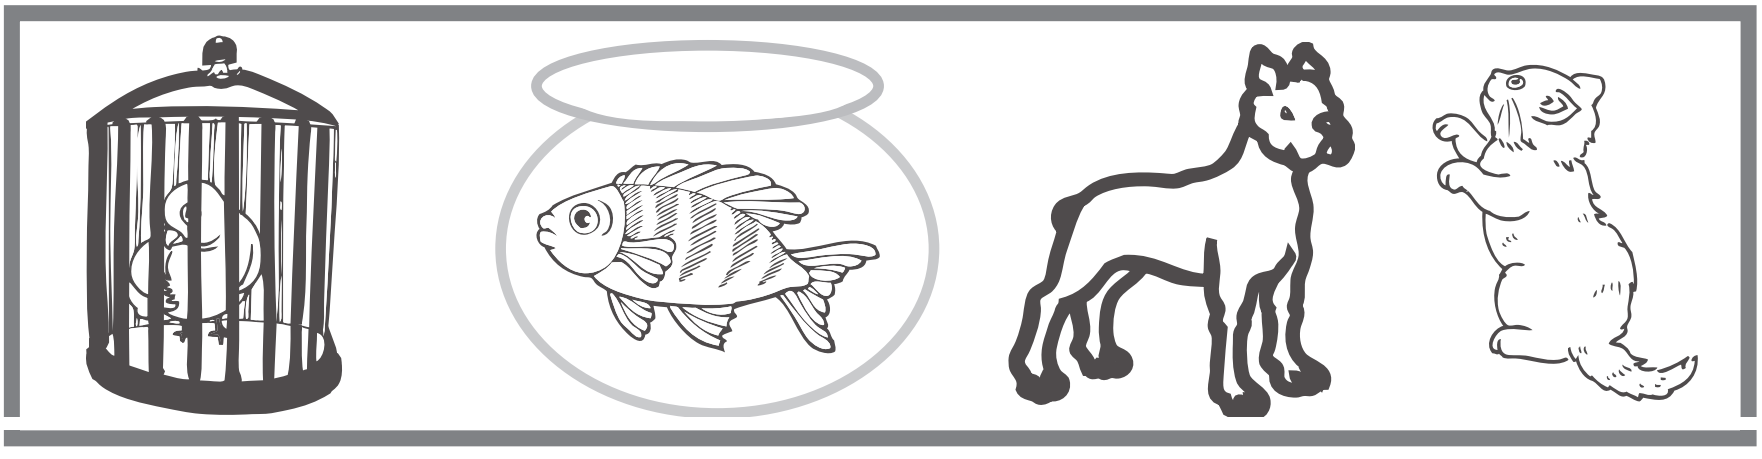
We use the wool to make sweaters.

We use the skin to make boots.

We use cotton to make clothing.

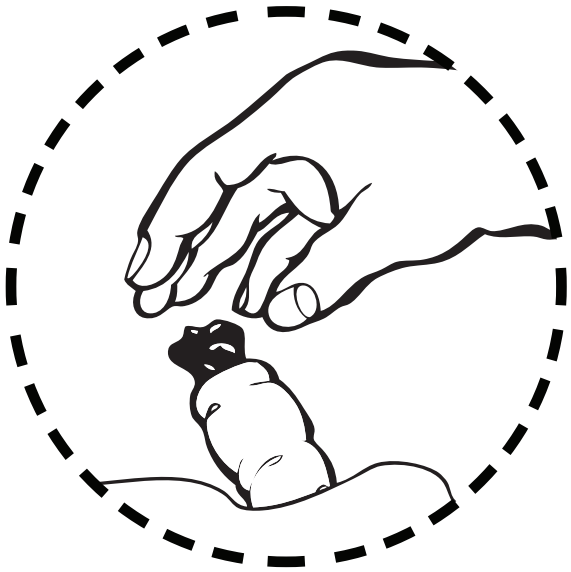
People like to give flowers to other people as gifts.

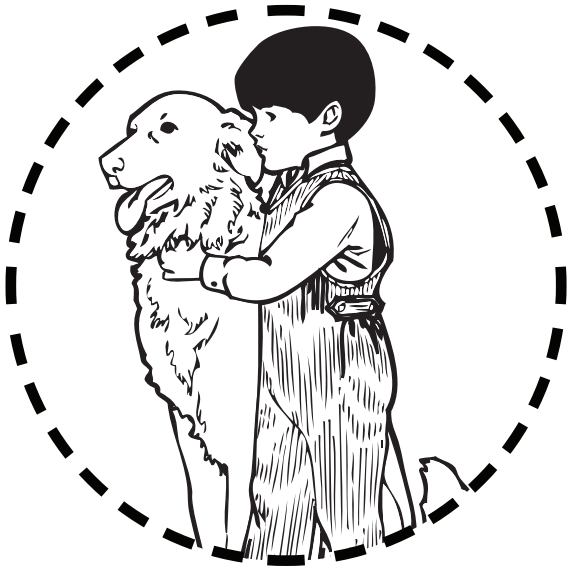
People like to keep animals as pets.

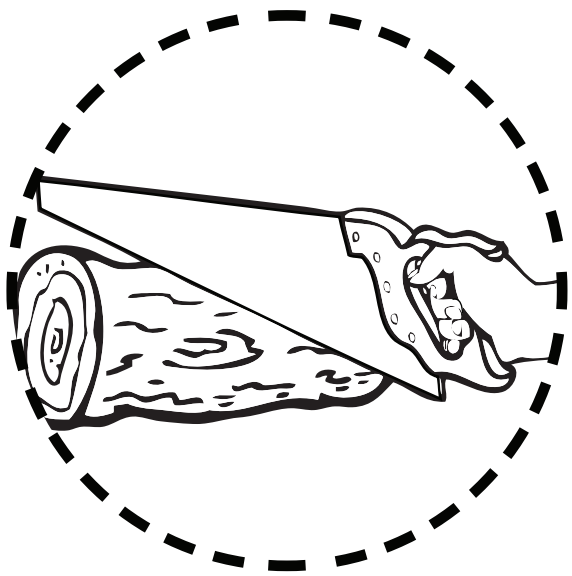


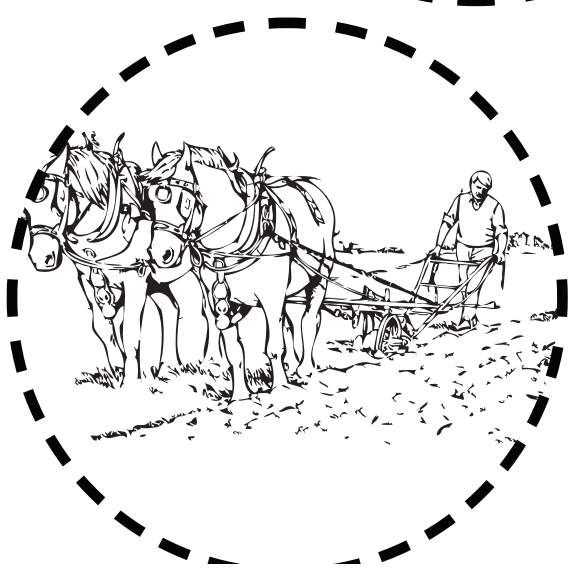
People and Nature

Read the information and trace the dotted words.









People and Nature

Trace all the ways we use plants and animals.

People are not animals.

True False

People need animals and plants.

True False

People do not eat animals.

True False

People like to keep animals as pets.

True False

People use animals for food, clothing, and shelter.

True False

People use plants to make homes or shelter.

True False

People like to grow plants.

True False

People use plants and animals every day.

True False

People are not animals.

True False

People need animals and plants.

True False

People do not eat animals.

True False

People like to keep animals as pets.

True False

People use animals for food, clothing, and shelter.

True False

People use plants to make homes or shelter.

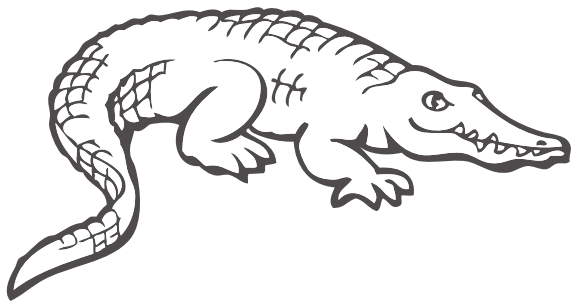
True False

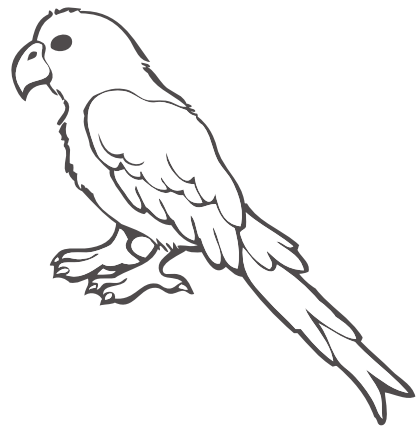
People like to grow plants.

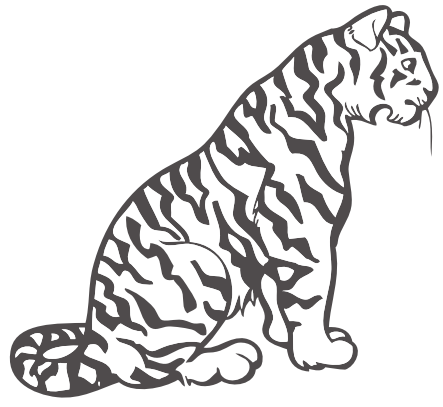
True False

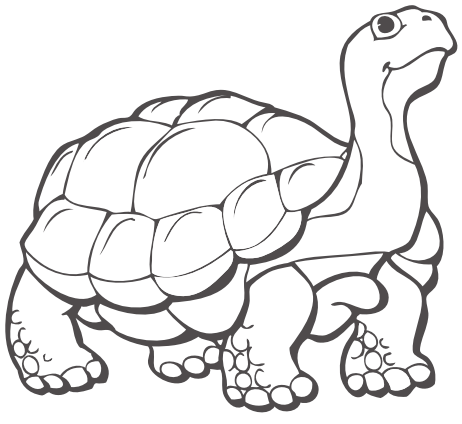
People use plants and animals every day.

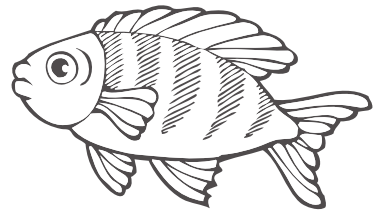
True False

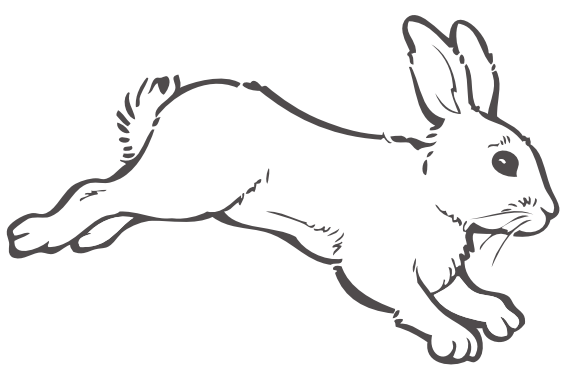


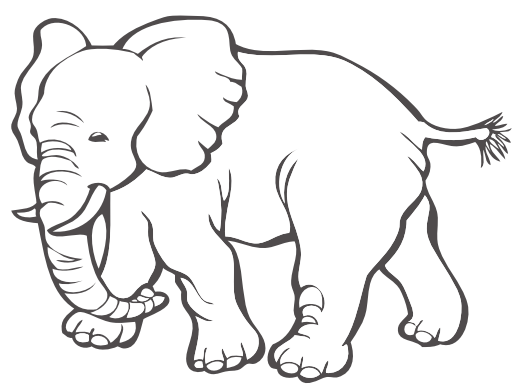


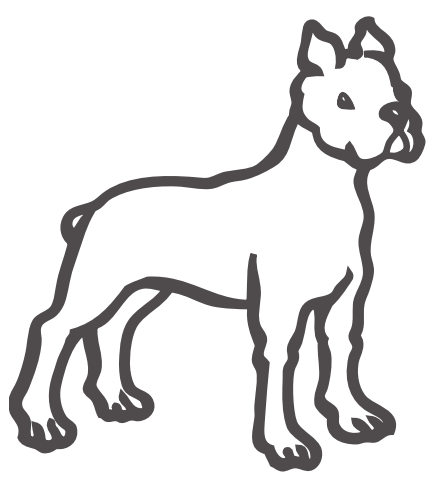












People and Nature

Circle the animals that would make good pets.
