Natural resources are things found in nature. Some of the most common natural resources are water, soil, wood, coal, minerals, and trees.

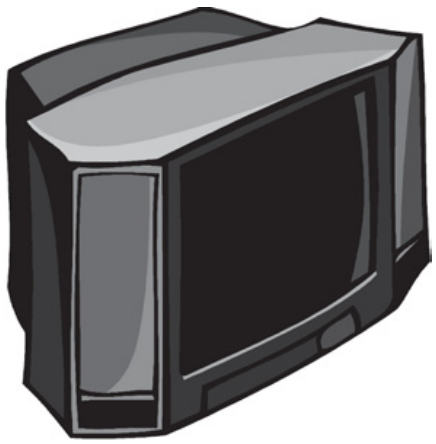
Man-made resources come from nature, but it takes people to make them into something man-made.

Pollution sometimes harms or destroys some of the earth's natural resources.

**Natural Resources**

*Read the information and trace the dotted words.*

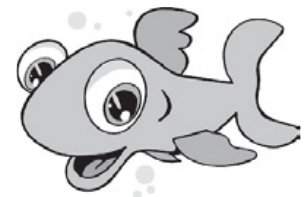
Look at the pictures below and circle those pictures that are natural resources.

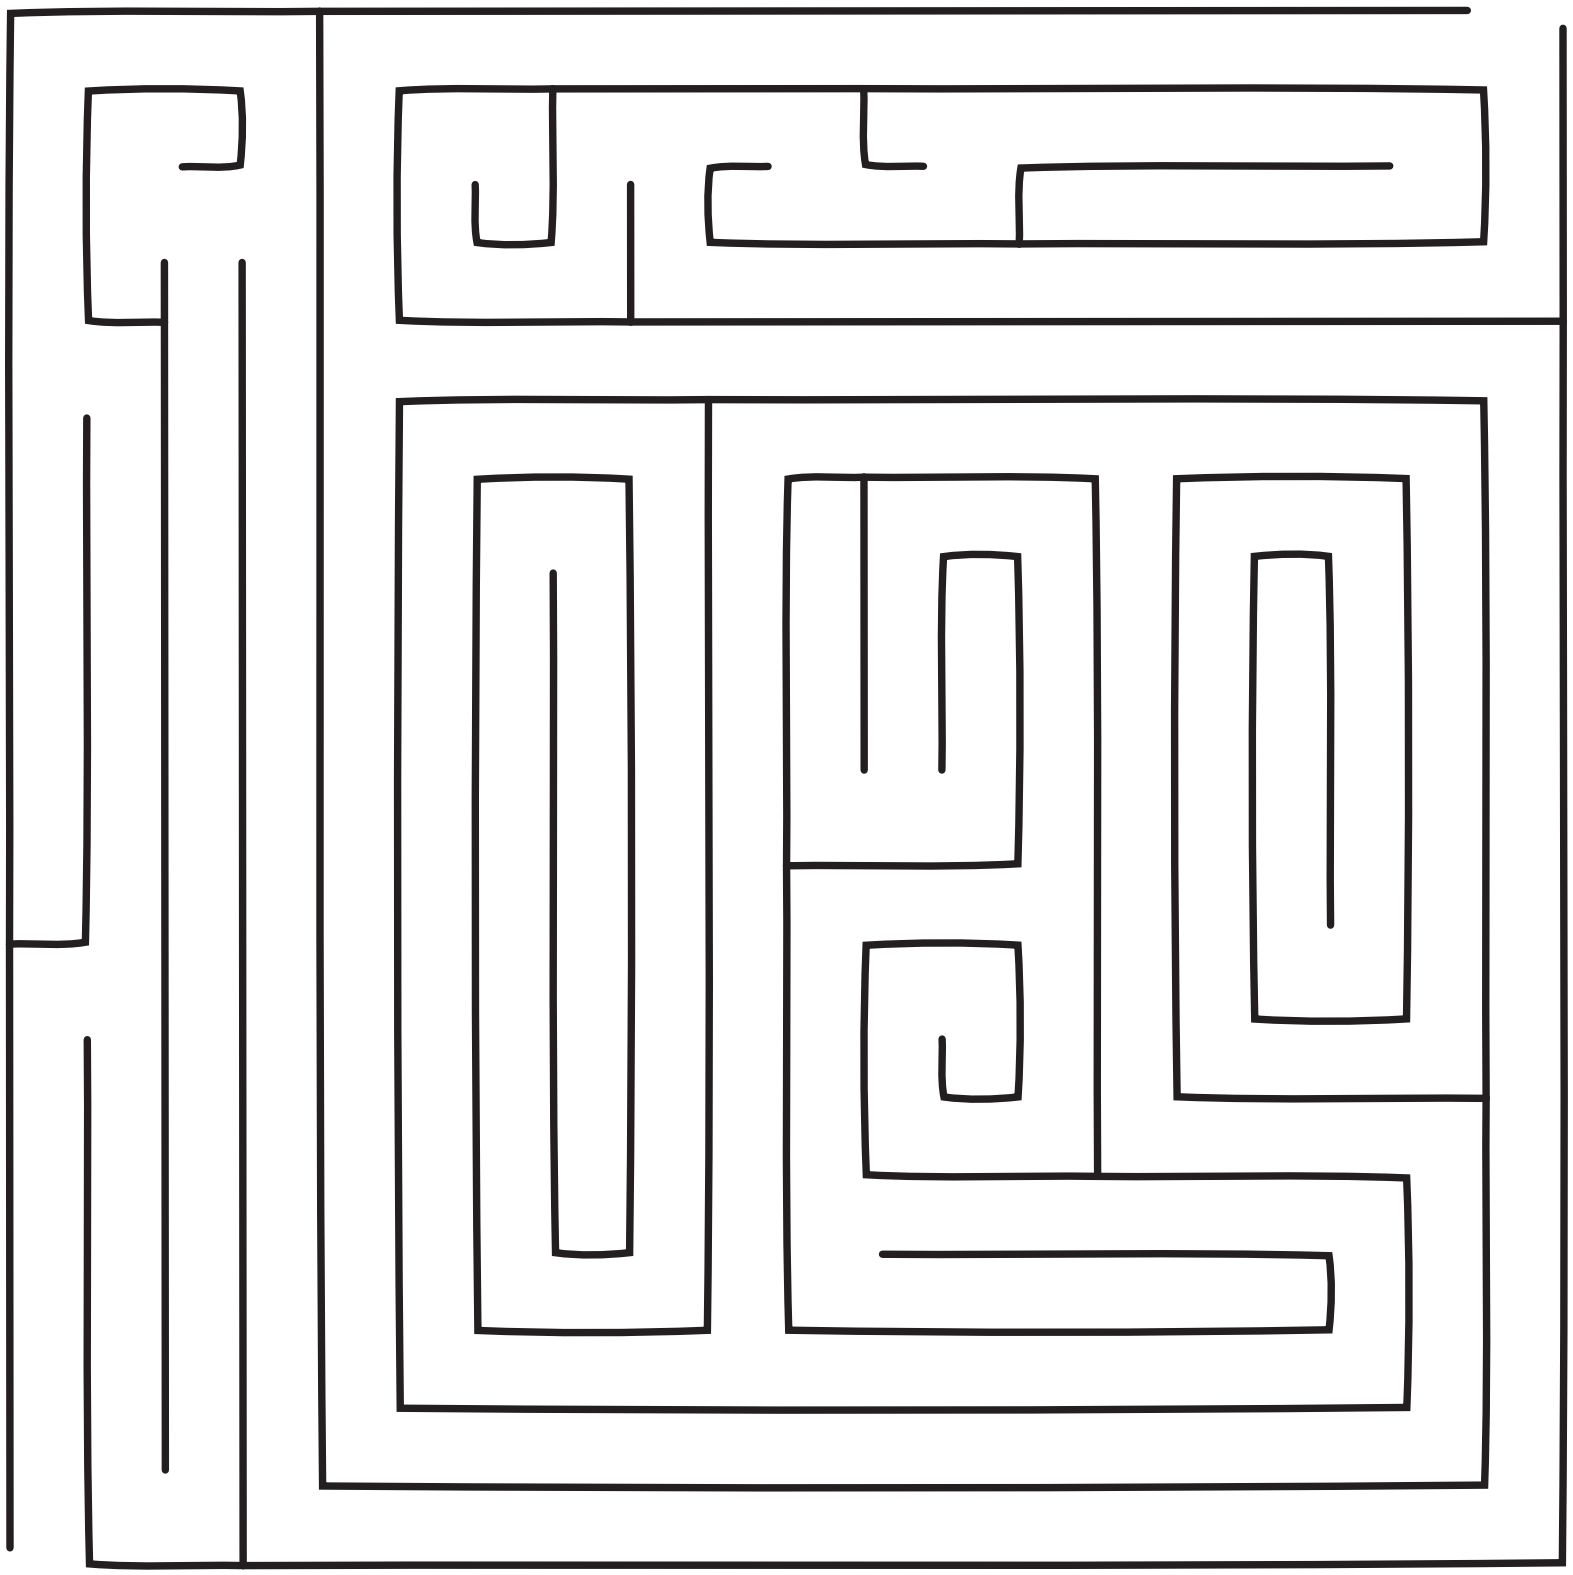


HINT: Natural resources are those things that can be found in nature; they are not made by man.

Can you help the fish find its way through the maze to its home in the lake?

Start





Finish

**Natural Resources**

*Complete the maze.*

Natural resources are things found in nature - the land around us.

We need land to live on, to grow our food, for play, and to provide the minerals we use every day.

Trees and plants provide many natural resources that we use in our everyday lives. We eat fruits, vegetables, and other foods that are grown for us everyday.

**Natural Resources**

*Read the information and trace the dotted words.*

The most important resource we have is water.

Seventy percent of the Earth is covered in water.

Water is so important because it is needed for plants to grow, for people to drink, and for

animals to drink. Without water, many of our natural resources would not live.

**Natural Resources**

*Read the information and trace the dotted words.*

## Word Bank

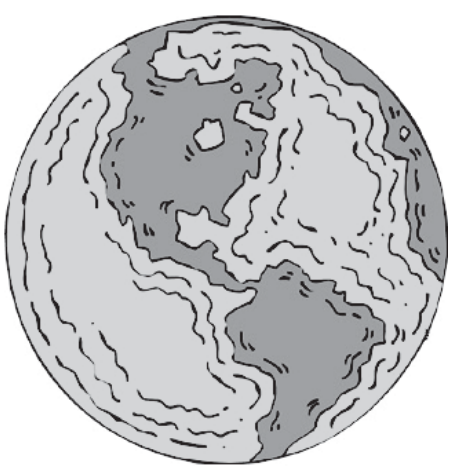
We find _____ _____

all around us in nature, the land around us.

The most important natural resource we have and use every day is _____.

All _____ and _____ need water to survive.

The Earth is made up of about _____ _____ percent water.



**Water**

*Read the information and fill in the blanks.*

Another important natural resource is

wood, which comes from trees. Trees are used for many different things in our everyday lives.

We use logs from

trees in the fireplace to help heat our homes. We use

wood cut from

trees to build houses and other buildings. All different kinds of

paper are

made from wood. Scientists have also found

many medicines

that are made from trees.

**Wood**

*Read the information and trace the dotted words.*

Many of our natural resources provide energy that is

needed for us to live our lives. Oil is a natural

resource that is a main ingredient

for many of the things we use every day.
Oil is found in many products

such as gasoline,

nail polish, plastics,

garbage bags, and tires.

**Oil**

*Read the information and trace the dotted words.*

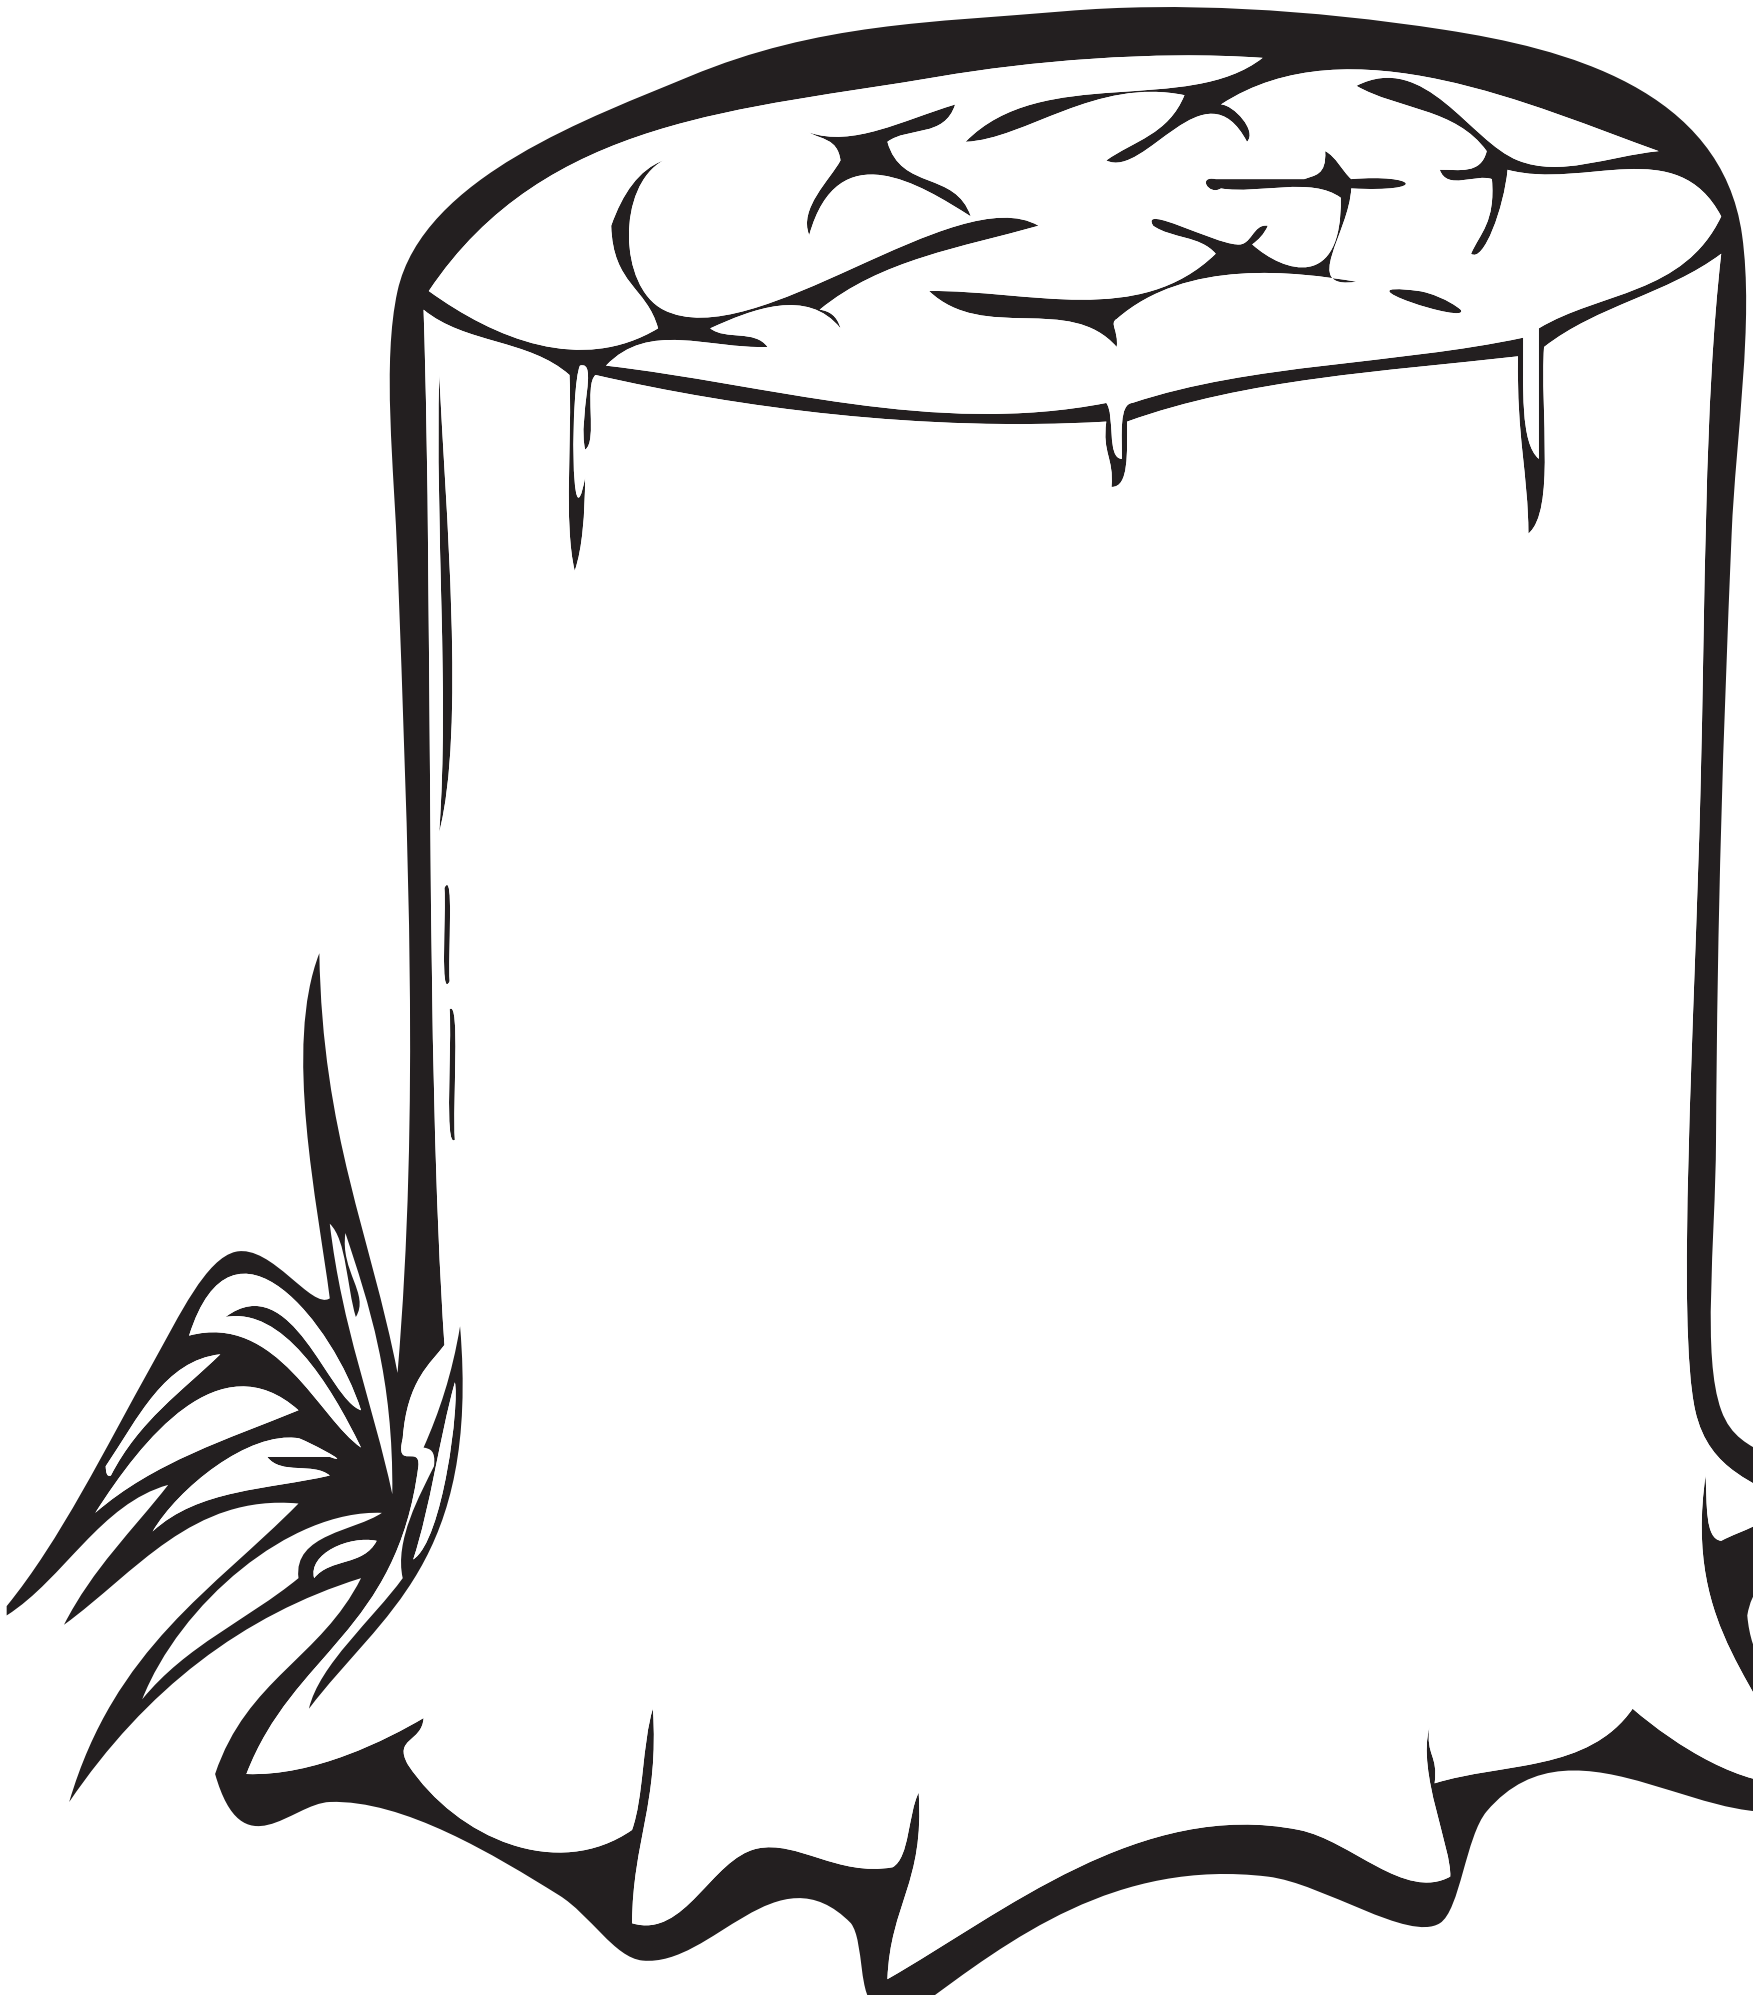
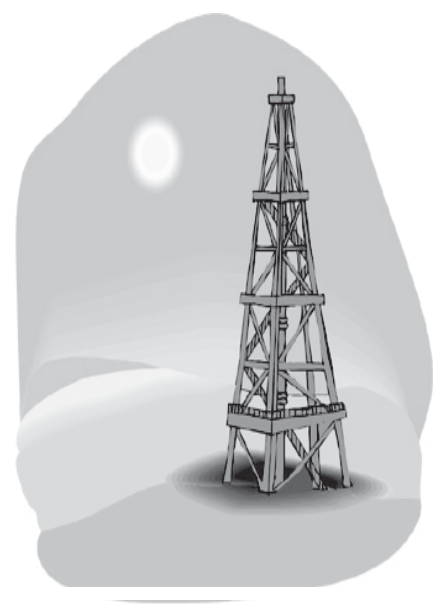
Draw a picture of a natural resource that you use every day.



**Natural Resources**

*Draw a picture of a natural resource.*

Many of our natural resources need to be used wisely so they do not run out. Some of our natural resources, such as trees, take a few years to grow back. This type of natural resource is called a renewable resource. Other natural resources, such as oil and minerals, take hundreds, thousands, or even millions of years to be made. This type of natural resource is called a non-renewable resource.

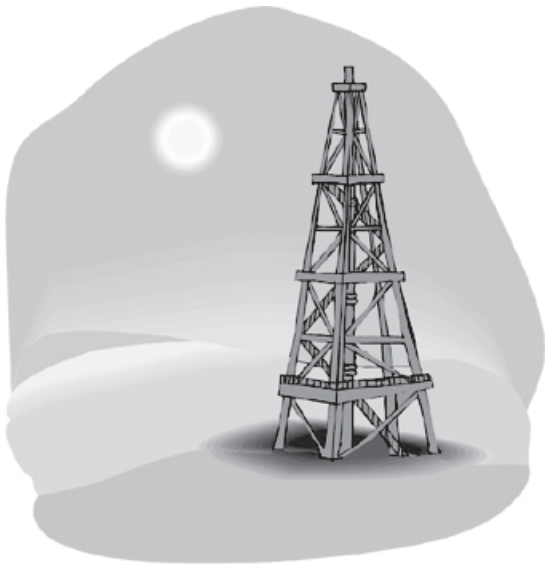


**Non-Renewable Resources**

*Read the information and trace the dotted words.*

Trace the dotted words that show some of the non-renewable resources.

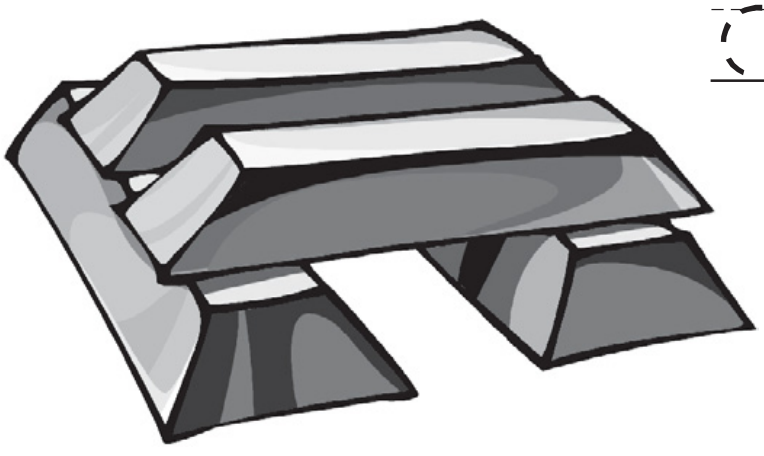
# Non-Renewable Resources



oil

diamond

coal



gold

natural gas

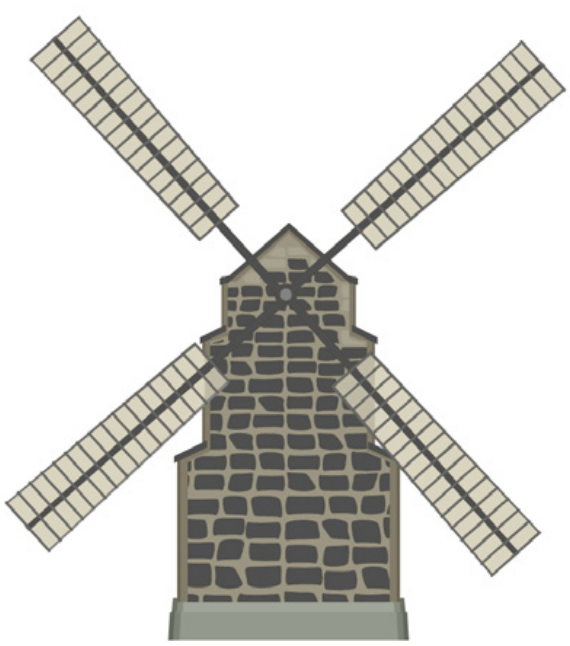
Trace the words that show some of the renewable resources.

# Renewable Resources

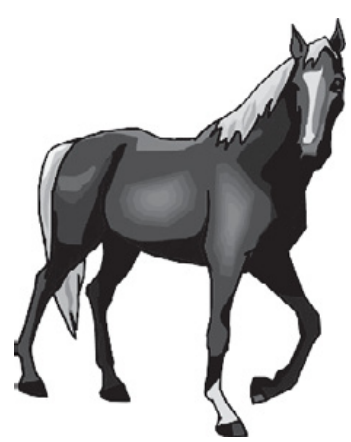
water

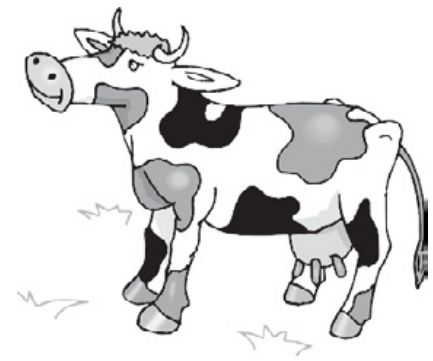
trees

plants



wind





animals

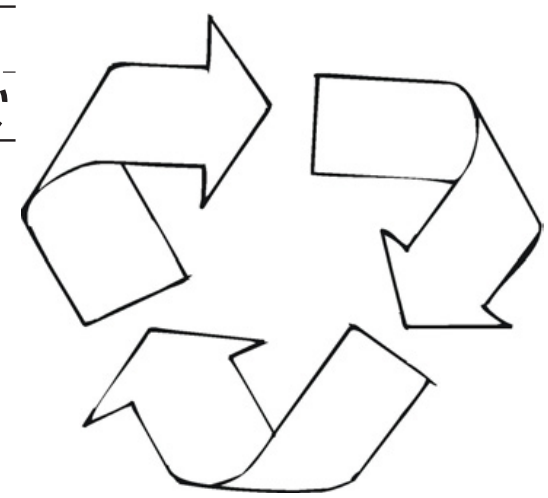
*Answers*

Many of our natural resources need to be used _____. If we are not _____ with our resources. then they may become hard to find, or _____.

To use our natural resources wisely, we need to _____, reuse , or _____ as many products as we can.



There are many things _____ we use _____ _____ that we are able to reduce, _____, or recycle.

**Reduce, Reuse, Recycle**

*Read the information and trace the dotted words.*

There are many ways that we can reduce the use of our natural resources.

We can reduce the amount of water we use each day by taking a shower instead of a bath.

We can reduce the amount of gasoline and oil we use by walking instead of driving our car. We can reduce the amount of water we use each day by watering our yard only at night twice a week.

**Reduce, Reuse, Recycle**

*Read the information and trace the dotted words.*

Use the Word Bank to complete the sentences. The first letter is shown to help you.

**Word Bank**

| careful | reduce | wisely | yard |
|---|---|---|---|

We need to be _____ C _____

with our natural resources so they do not run out, or become scarce.

One way to reduce the amount of water we use each week is by _____

watering the _____ Y _____ at night only twice each week.

To use our natural resources we need to make sure we try and recycle as much as possible.

Everyone can help save our natural resources _____ _____

_____ W _____, if they _____ R _____ the amount of gasoline by walking instead of driving a car.

©2007-2011 NeoLithix, LLC Patent Pending All Rights Reserved

What do we need to do with materials that we use each day to help protect our natural resources?

throw them away recycle them burn them

How can we help save the amount of water we use every day?

Take three showers a day water the yard every day

water the yard at night

If we are not careful with our natural resources, then they may become_____.

hard to find easy to find

**Reduce, Reuse, Recycle**

*Circle the answer to each question.*

What do we need to do with materials that we use each day to help protect our natural resources?

throw them away  recycle them  burn them

How can we help save the amount of water we use every day?

Take three showers a day  water the yard every day

water the yard at night

If we are not careful with our natural resources, then they may become_____.

hard to find  easy to find

**Reduce, Reuse, Recycle**

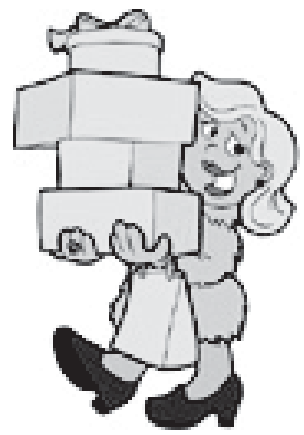
*Find the words in the Word Bank and circle them.*

An easy way to help save our natural resources is to reuse some of the things we use each day instead of throwing them away.

To reuse an item means to use it again in a different way, or even in the same way.

Sometimes we have to repair items before we can use them again, like an old bicycle.

We can reuse boxes, plastic bags, and cloth towels which reduces the amount of trash we throw away.



Trying to find a place to keep all the things we use can sometimes be hard.

**Reuse**

*Read the information and trace the dotted words.*

One of the most effective ways to save our natural resources is by

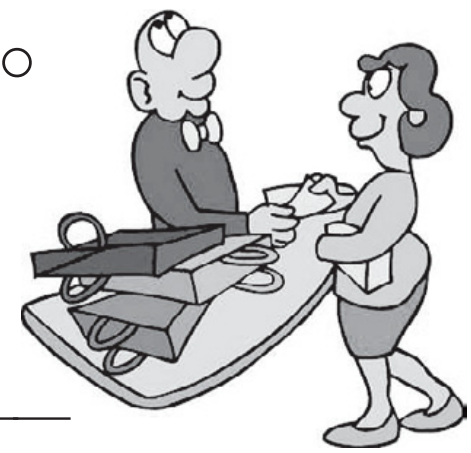
recycling. A few items we

can recycle are paper, plastic,

cans, and glass. A recycled item is something that

can be remade into something else. Many

everyday things are made of



recycling materials. Buying products made of recycled

material is a way to help take care of our natural resources. Look for the recycle

symbol when you buy products.

**Recycle**

*Read the information and trace the dotted words.*

Everyone needs to help by recycling those things we can use again in a different way. Place an **R** in the box under the pictures of items we can recycle.

**Recycle**

*Choose the correct items.*

Everyone needs to help by recycling those things we can use again in a different way. Place an **R** in the box under the pictures of items we can recycle.

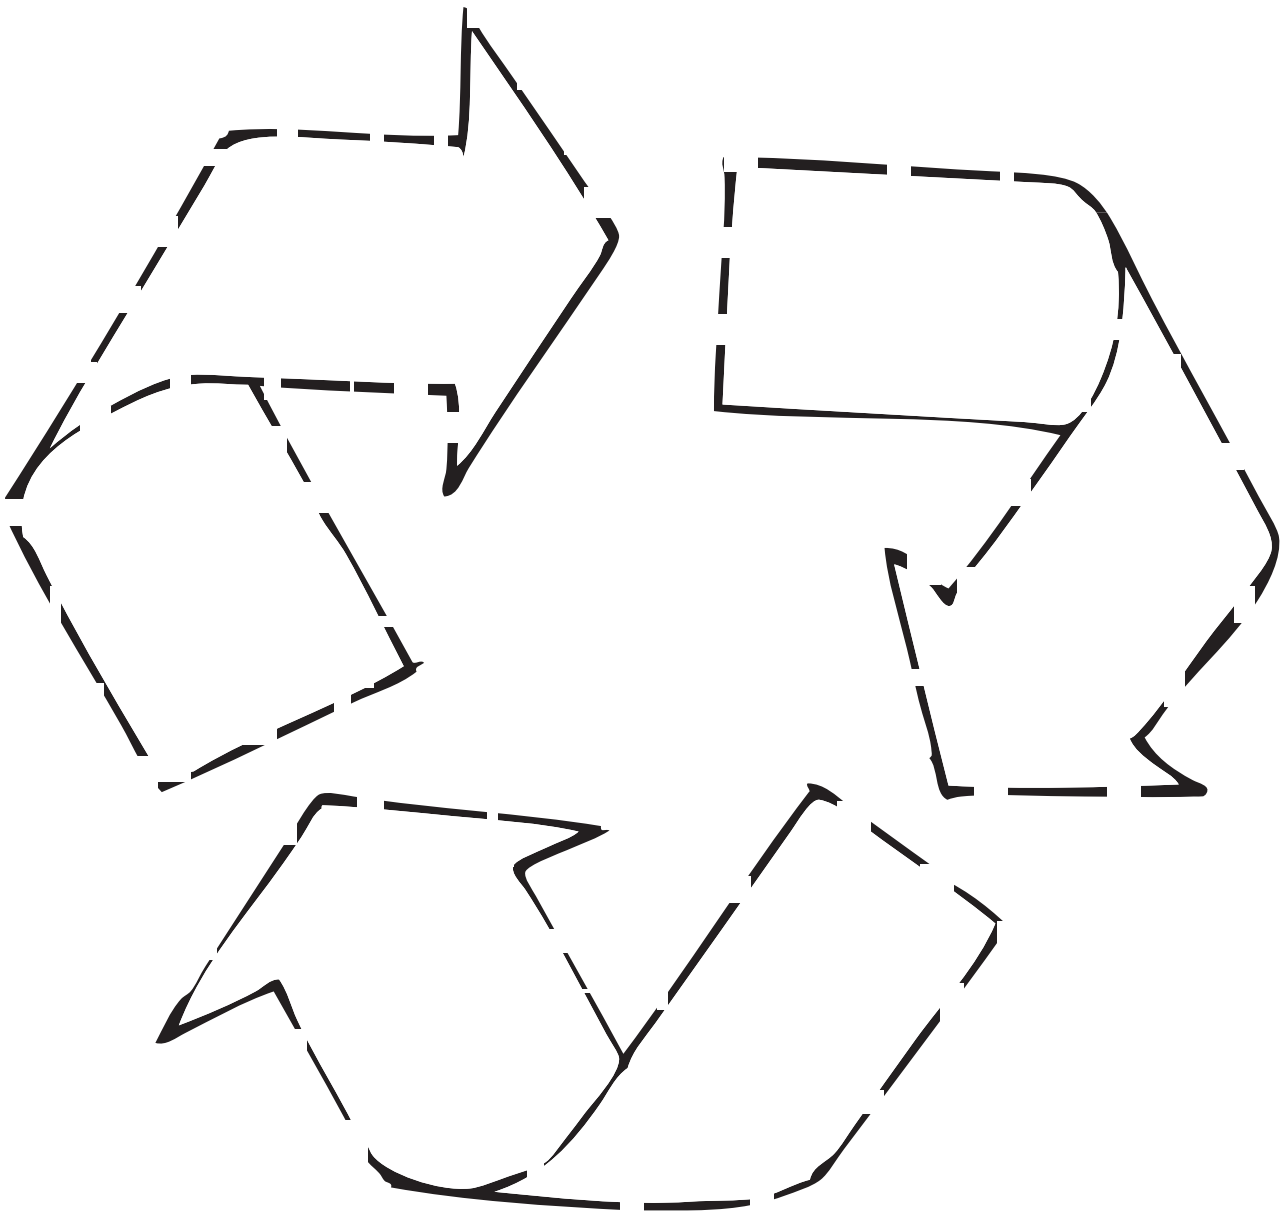
R R R

R R R

**Recycle**

*Answers*

Many products that are made of recycled materials have the recycle symbol somewhere on the product. Below is what the recycle symbol looks like. Trace the recycle symbol and be sure to look for products that are able to be recycled or that are made from recycled materials.



Recycle

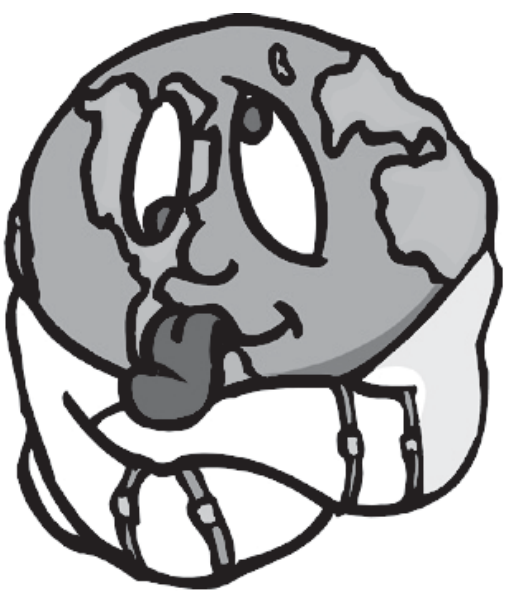
**Recycle**

*Trace the picture and the dotted word.*

When we do not throw things away where they belong, we can hurt our natural resources by causing pollution.

Pollution can be found in three places: air, land, and water.

Pollution is when the air, land or water is very dirty.



Pollution can harm plants and animals which hurts our whole planet.

**Pollution**

*Read the information and trace the dotted words.*

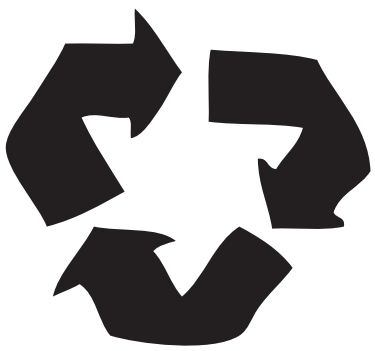
Use the words from the Word Bank to complete the sentences below. The first letter of each word is shown for you.

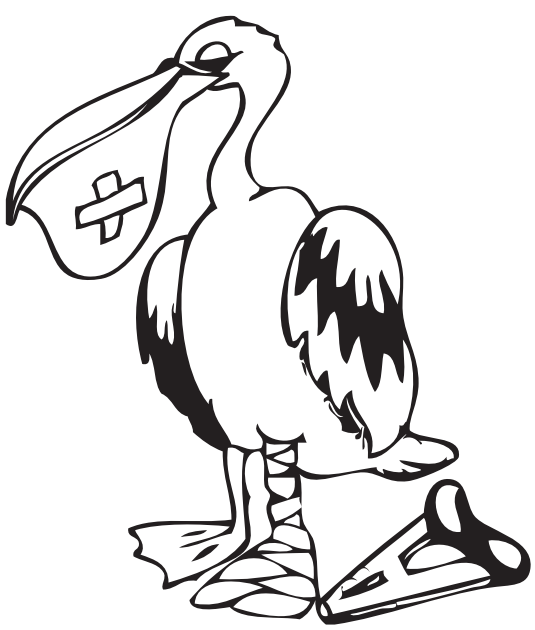
**Word Bank**

| | | | |
|---|---|---|---|
| **pollution** | **recycle** | **water** | **hurt** |

Pollution is when air, land, or w_____ is very dirty. If we are going to take care of our natural resources, then we need to r_____ many of the items we use each day. When we don't throw items away where they belong, we hurt our natural resources and cause p_____.

Pollution can h_____ plants and animals, which hurts our whole planet.





**Pollution**

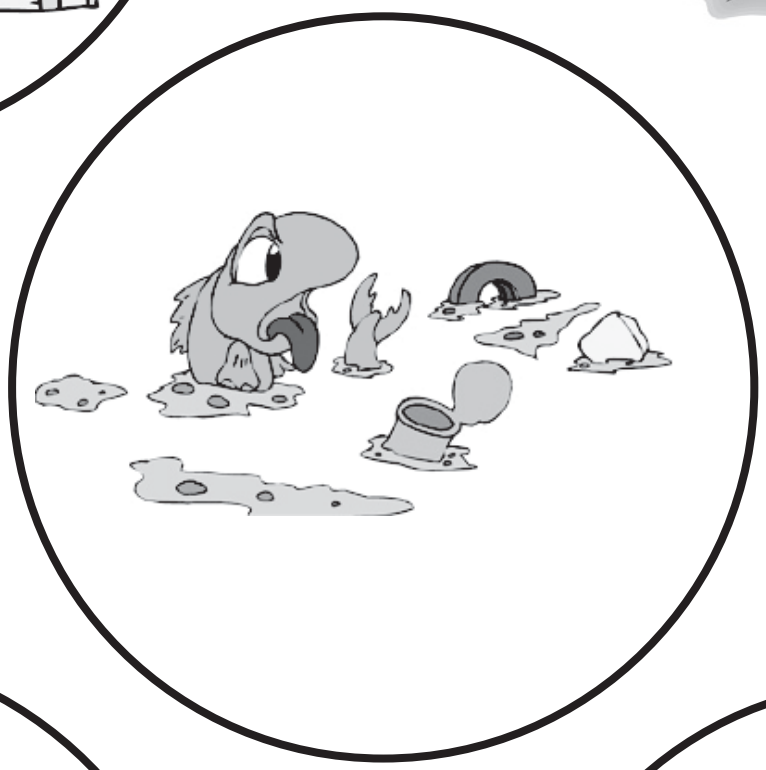
*Fill in the blanks.*

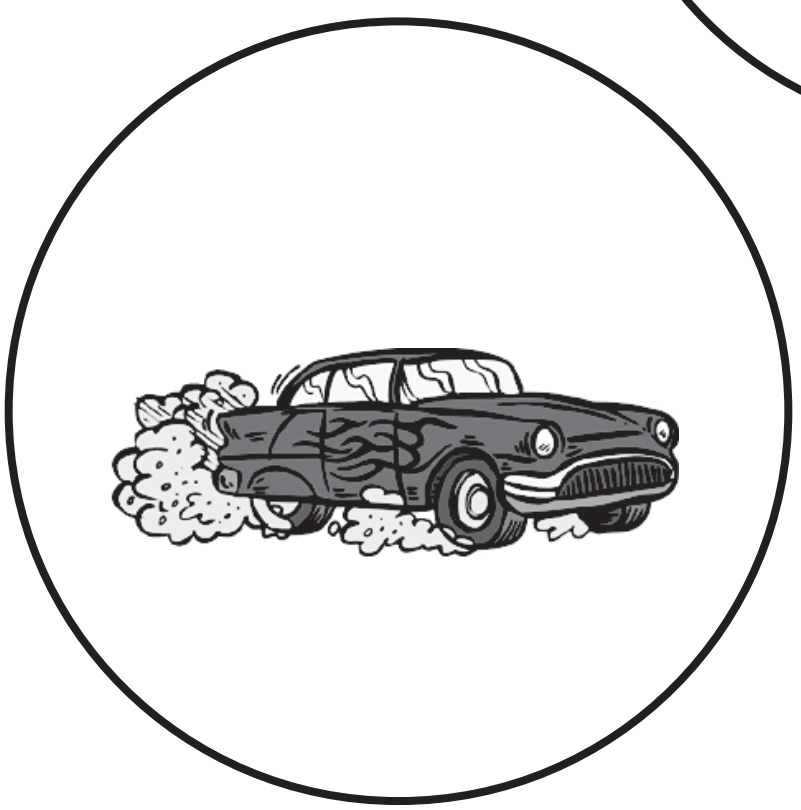
Circle all of the pictures that show examples of air, land, or water pollution.

**Pollution**

*Answer the questions.*

Circle all of the pictures that show examples of air, land, or water pollution.





We take care of our natural resources by following the 3 R's. The 3 R's we need to follow are reduce, reuse, and recycle. Fill in the chart with examples of ways you can reduce, reuse, and recycle.

| The 3 R's | | |
|---|---|---|
| reduce | reuse | recycle |
| | | |

**Reduce, Reuse, Recycle**

*Fill in the chart.*
