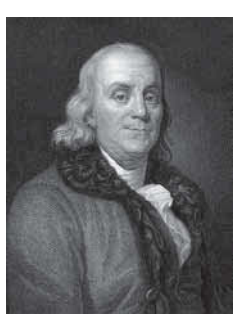
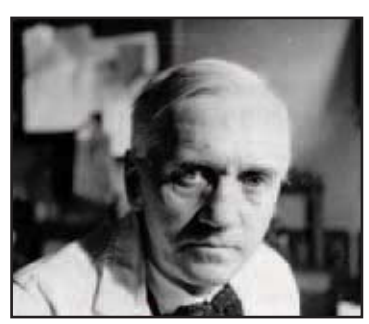
Throughout the ages our world has been altered by the imaginations and natural curiosities of boys and girls just like you. Moments of discovery has spurred many men and women to explore the makings of our world and the unknown. Without their scientific contributions, our world would not be the same. Many of the luxuries we enjoy today would not exist. Not only has science made our lives easier, but it has also opened the door to many discoveries that have saved lives. Some of these life-altering discoveries were made by people like Sir Isaac Newton, Benjamin Franklin, Marie Curie, Alexander Fleming, Charles Darwin, and Niels Bohr.

Sir Isaac Newton

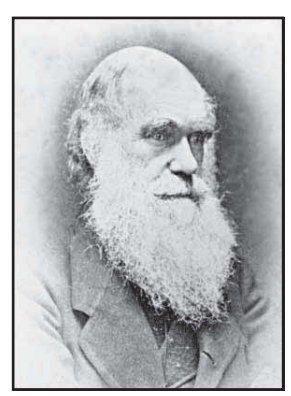


Benjamin Franklin

Marie Curie



Alexander Fleming



Charles Darwin

Niels Bohr

physics - science that deals with matter, energy, motion, and force.

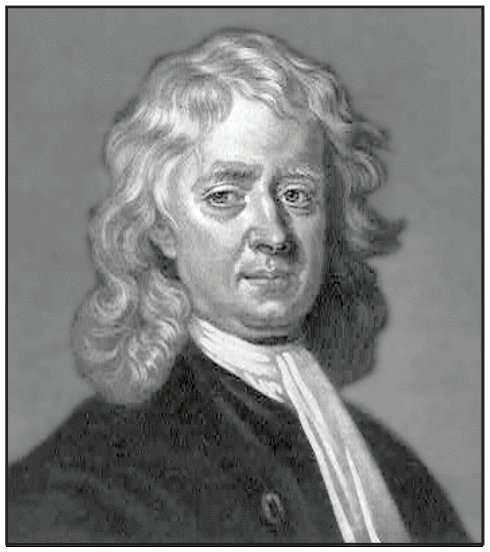
atom - smallest component of an element.

radiation - harmful rays that can also be used in medicine.

evolution - a change in traits over time.

controversial - subject to debate.

Petri dish - circular dish used for growing bacteria or organisms



Isaac Newton is considered by many as the father of modern science. He is given this title due to his varied and numerous discoveries. Some of his discoveries include defining the laws of gravity and planetary motion, co-founding the field of calculus, and explaining the laws of light and color. Many believe Newton was inspired to explore gravity when he was hit on the head by a falling apple. Newton died in 1727 and was the very first scientist to be honored by being buried in Westminster Abbey.

Isaac Newton

Read the information and trace the dotted words.

Isaac Newton	**light**	**color**
planetary motion	**gravity**	**apple**

_____ _____

I _____ N _____

_____ _____ is considered by

many to be the father of modern science.

_____

Isaac Newton helped define the laws of G _____ .

_____ _____

He also studied P _____ m _____

_____ _____

and the laws of _____ and C _____ .

It is believed that Newton became interested in the laws of

_____

gravity when an O _____ falling from a

tree hit his head.

Isaac Newton

Use the Word Bank to fill in the blanks.

Isaac Newton helped define the laws of _____.

Time Gravity Language

Some people consider Issac Newton the _____ .

Father of modern science Best researcher Oldest

Newton studied planetary motion, light, and _____.

Time Color Cars

It is believed Newton was inspired to study gravity when he was hit on the head by a falling _____.

Orange Limb Apple

Isaac Newton *Circle the correct answer.*

Isaac Newton helped define the laws of _____.

Time Gravity Language

Some people consider Issac Newton the _____ .

Father of modern science Best researcher Oldest

Newton studied planetary motion, light, and _____.

Time Color Cars

It is believed Newton was inspired to study gravity when he was hit on the head by a falling _____.

Orange Limb Apple

Newton	**Light**	**Science**	**Color**
Planets	**Motion**	**Gravity**	**Apple**

L E T W S N N
I T L G C O S

Charles Darwin is most well-known for his theory of evolution that caused major controversy. His book, The Origin of Species, presented the idea that species evolve, as the fittest members pass on their traits to future generations. This theory was so controversial during the 1850's because it was thought that it contradicts with the teachings of the Bible. Today, however, Darwin's theory is respected by scientists and is believed to be the starting point of the study of evolutionary biology.

Charles Darwin

Read the information and trace the dotted words.

survive	**biology**	**generation**
fittest		**controversial**

Charles Darwin developed the theory of the survival of the

_____

f _____ . This theory says that only the fittest

_____

of the species will s _____ to pass on traits

_____

to the next g _____ .

His book, The Origin of Species, announced his ideas of

_____

natural selection and was very c _____ .

Darwins work is believed to ve the starting point of

_____

evolutionary b _____ .

Charles Darwin

Use the Word Bank to fill in the blanks.

Charles Darwin developed the theory of evolution.

True False

Darwin's Famous book, The Origin of Species, was accepted by all people at the time.

True False

The theory of evolution states the fittest of the species will survive.

True False

Today, scientists do not believe Darwin's work has any credibility.

True False

Darwin's work was the starting point of evolutionary biology.

True False

Charles Darwin *Circle the correct answer.*

Charles Darwin developed the theory of evolution.

True False

Darwin's Famous book, The Origin of Species, was accepted by all people at the time.

True False

The theory of evolution states the fittest of the species will survive.

True False

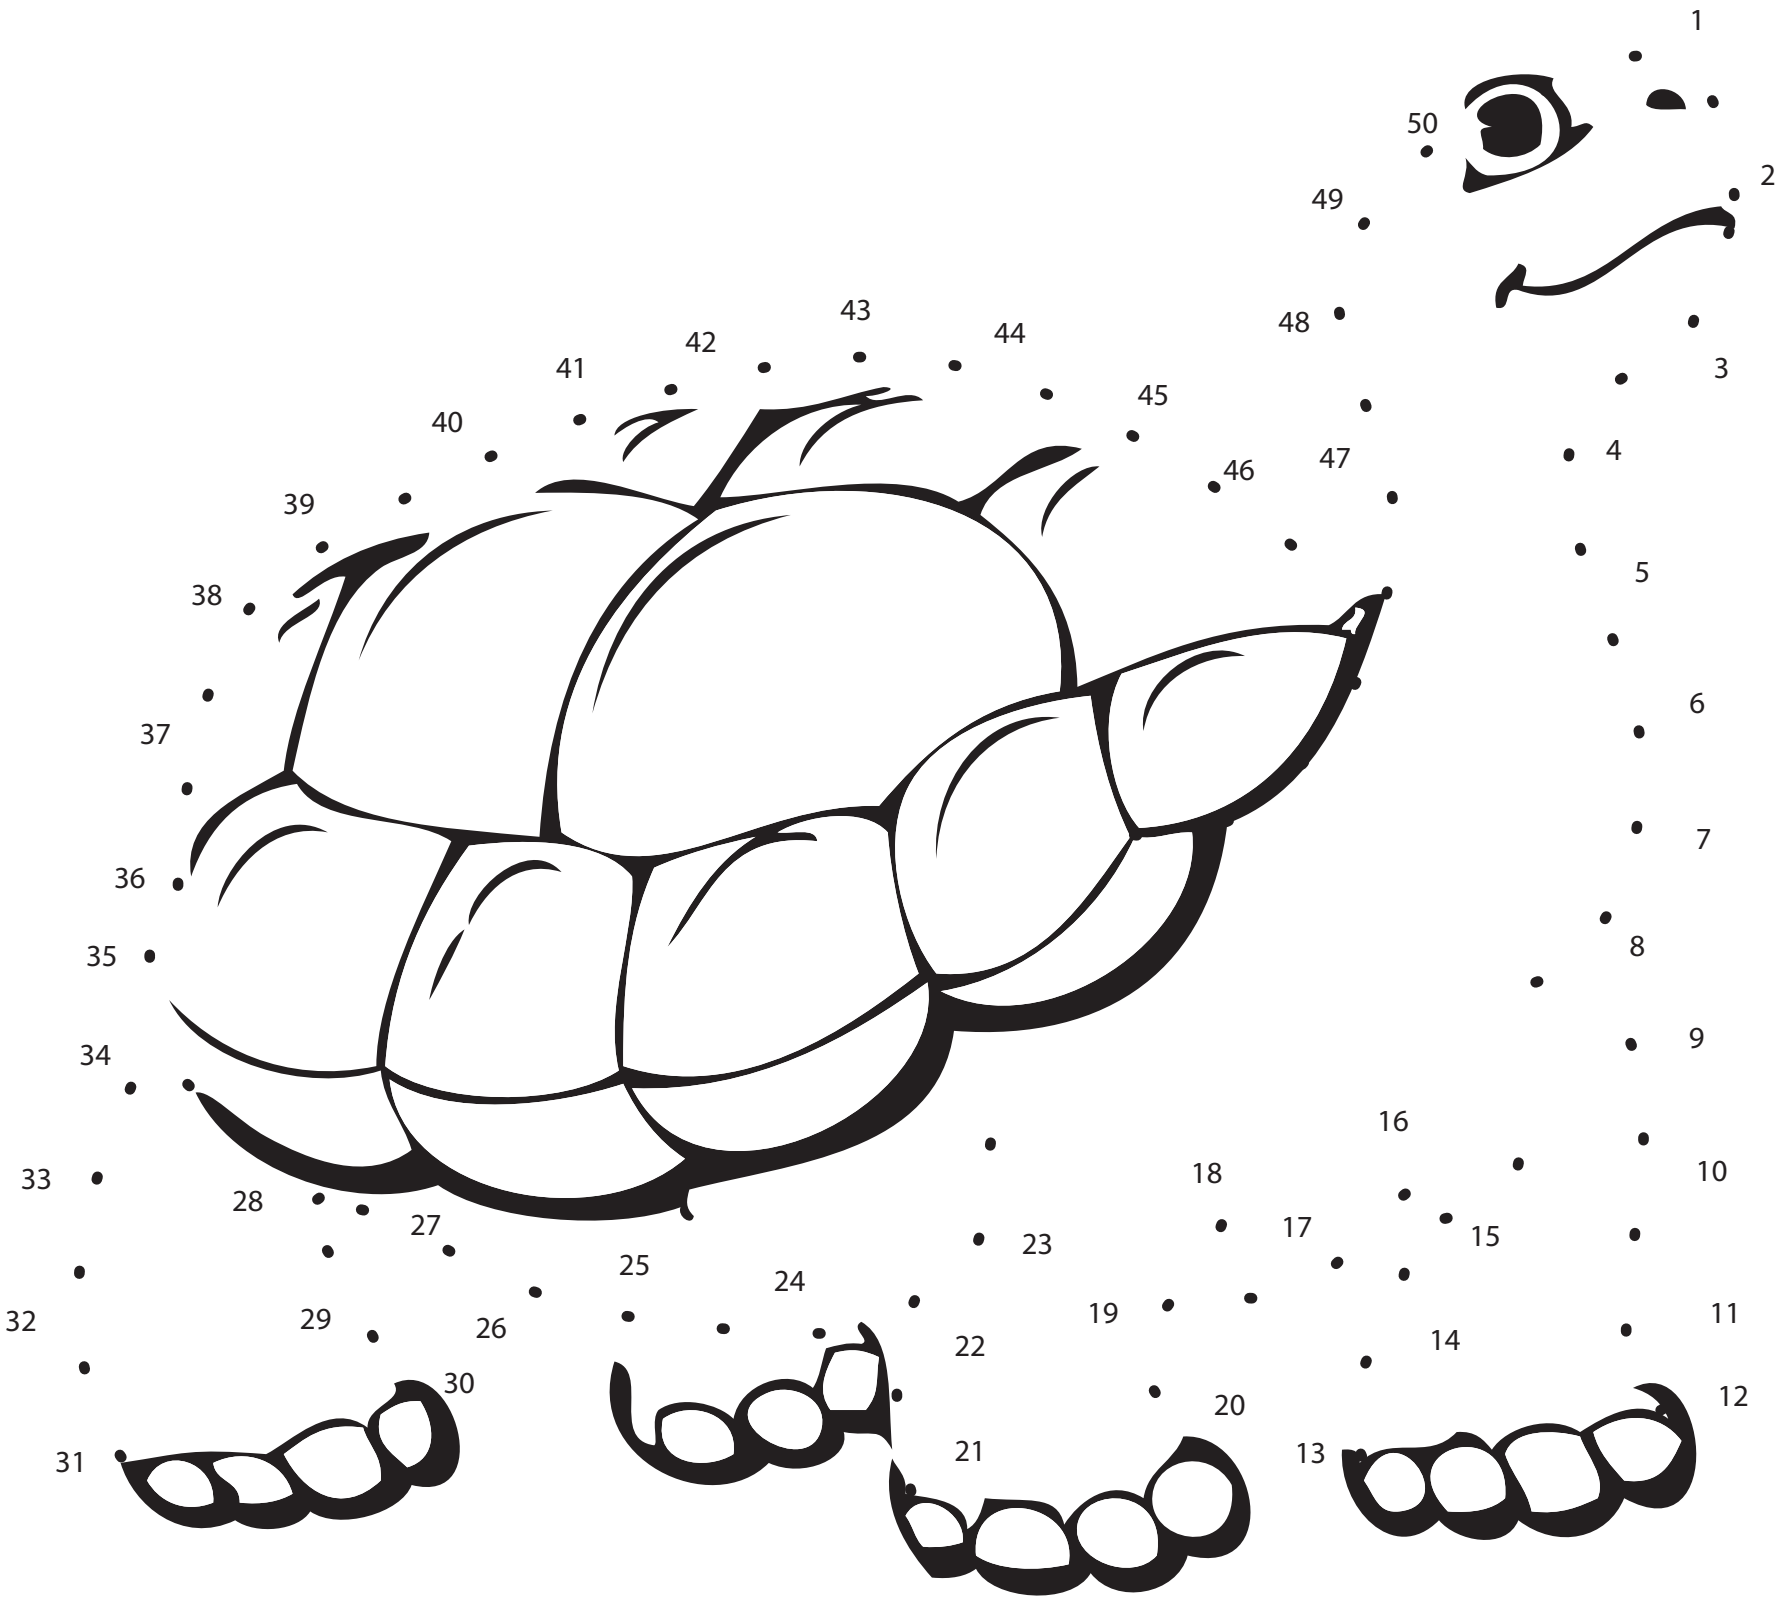
Today, scientists do not believe Darwin's work has any credibility.

True False

Darwin's work was the starting point of evolutionary biology.

True False

One of the places that spurred Darwin's theory of evolution was the Galapagos Islands. There he found many animals that had developed traits never seen before that helped them survive in their unique environment. Connect the dots to discover one of the animals he saw.



Charles Darwin

Connect the dots.

Marie Curie was a chemist and physicist. Her work began in 1895 on radiation experiments with radium. Marie was the first person to coin the term "radioactivity" to describe the emission of uranic rays. In 1898, Marie and her husband discovered polonium and radium. This led to their work that earned them the Nobel Prize in physics in 1903. After the death of her husband in 1906, Marie took over his post as professor at the Sorbonne. Marie Curie was the first woman to ever hold this position. Her extensive studies in radioactive material led to the development of cancer treatments using radiation.

Marie Curie

Read the information and trace the dotted words.

radiation	**Nobel**	**woman**
physicist	**cancer**	

Marie Curie won the N _____ Prize in 1903. Her work with r _____ earned her this award.

Marie was the first W _____ to teach at the Sorbonne.

She was a chemist and a P _____ . Marie's work helped establish many of the uses of radioactive elements.

This work helped in the development of many of the C _____ therapies used today.

Marie Curie

Use the Word Bank to fill in the blanks.

Who was Marie Curie?

_____

What did Marie deal with in her work?

_____

Why is Marie's work still important today?

_____

Where was Curie the first woman professor?

_____

What prize did Marie win for her work?

Who was Marie Curie?

She was a chemist and physicist.

What did Marie deal with in her work?

Marie dealt with radiactive elements.

Why is Marie's work still important today?

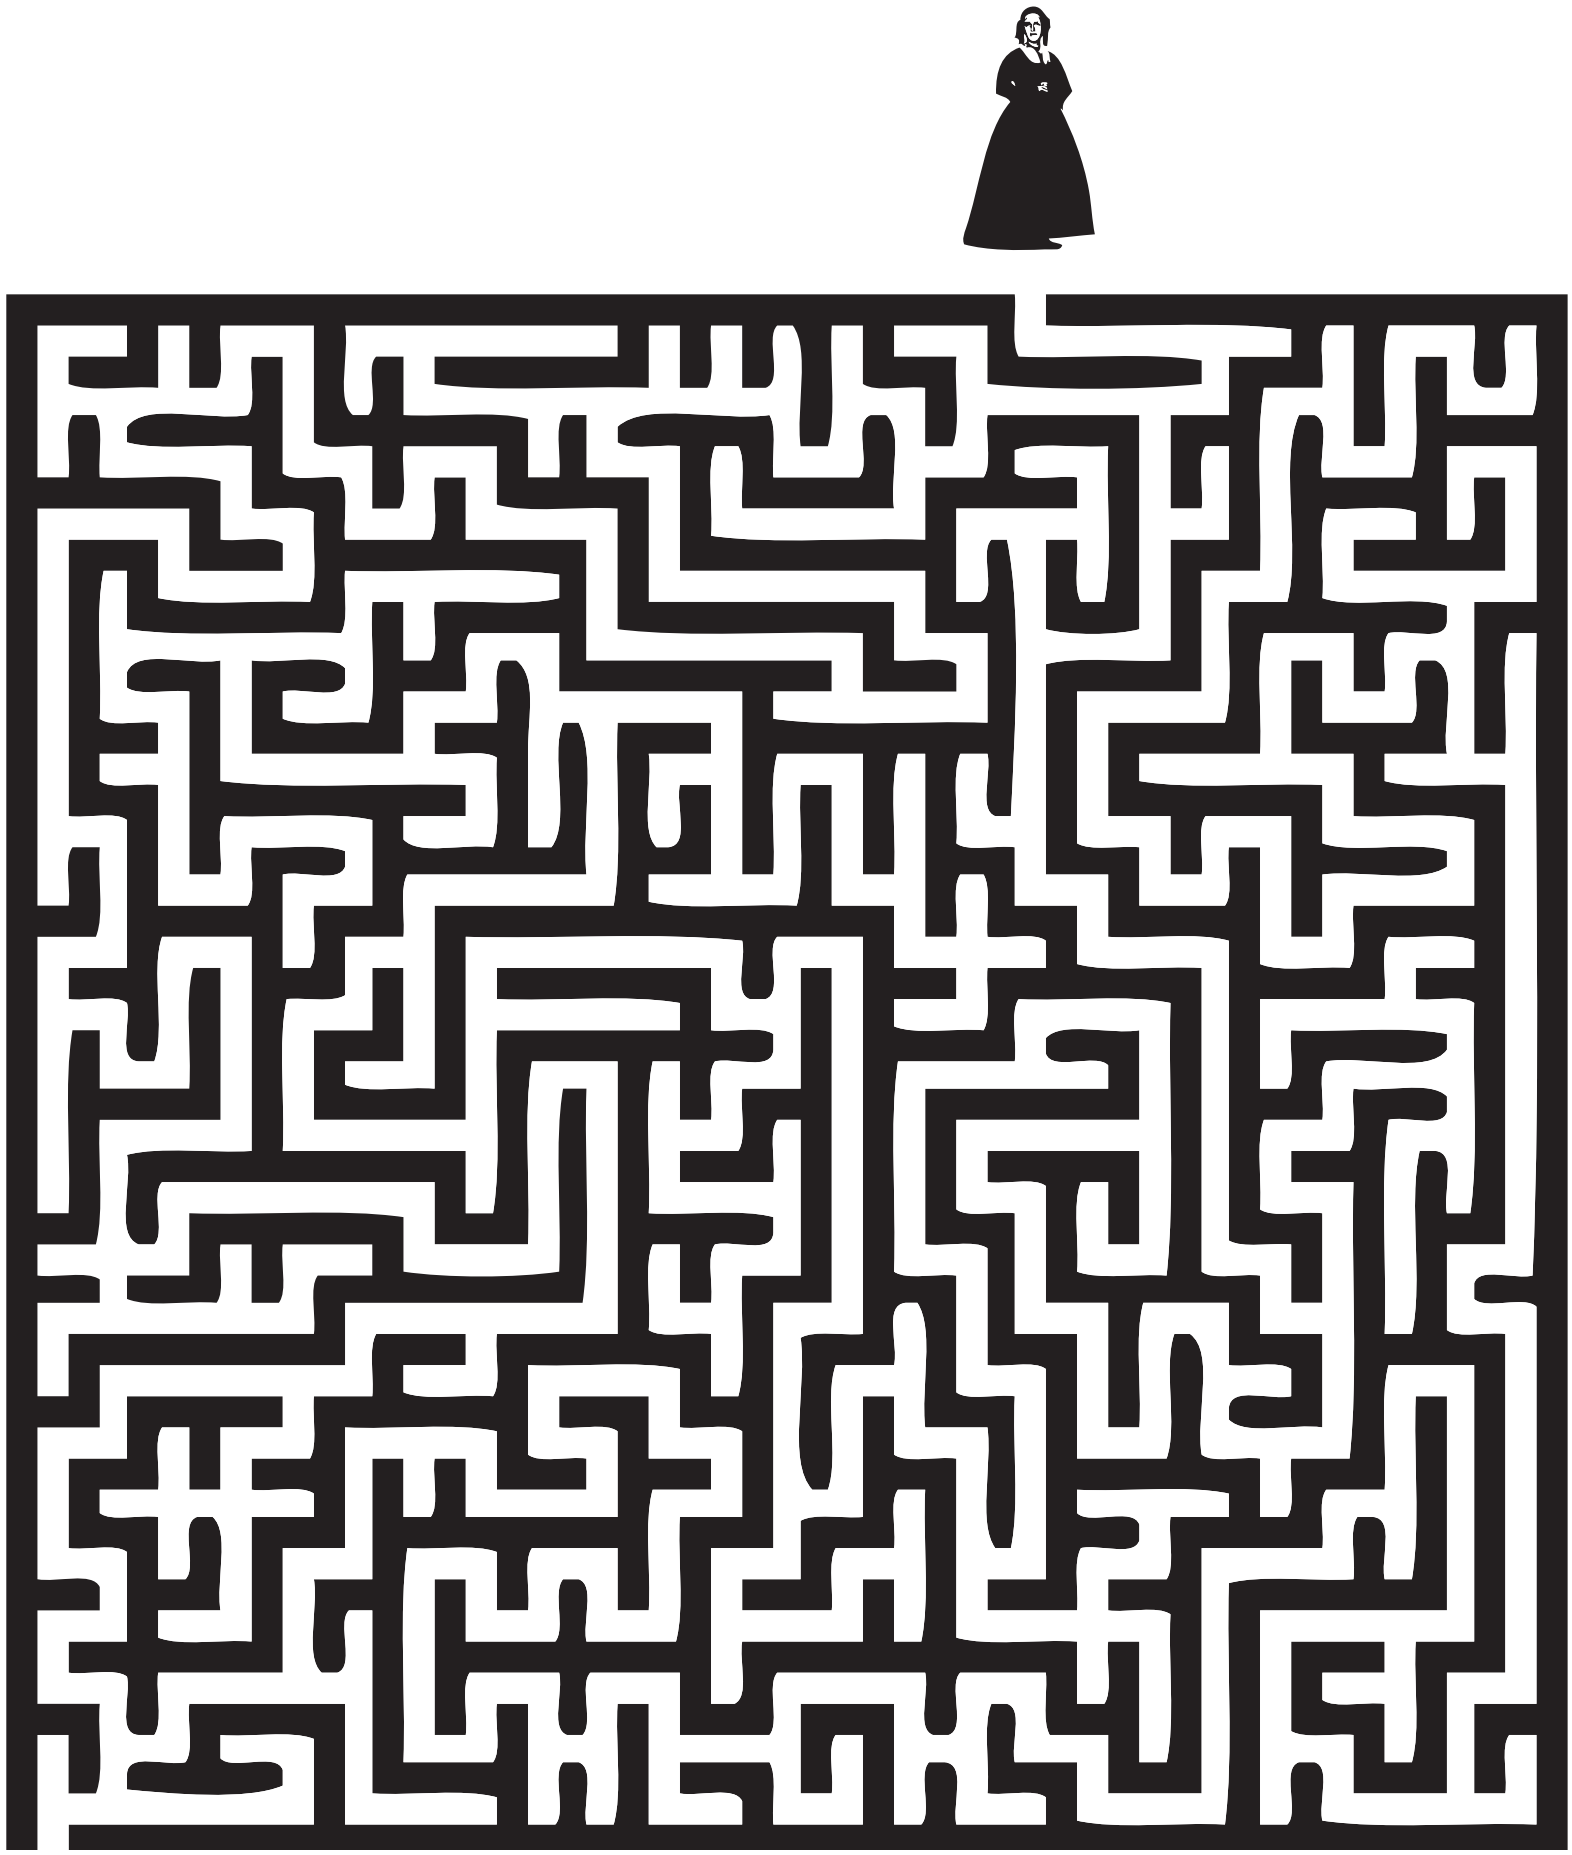
Her work is still used in cancer therapies.

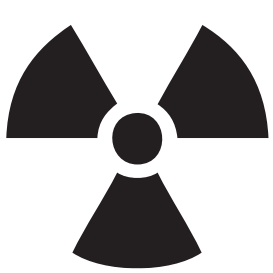
Where was Curie the first woman professor?

She was the first woman to teach at the Sorbonne

What prize did Marie win for her work?

Marie won the Nobel Prize in 1903.





Marie Curie

Help Marie find her work.

Alexander Fleming was a researcher in search of a chemical that could stop the strong bacterial infections he had seen from the battlefields. Through his research, he discovered many different agents that had antibacterial effects, but none of these could stand up to the strongest bacterial infections. In the chaos of his lab he found a stack of Petri dishes that had been growing bacteria piled in a sink. While cleaning the mess he took notice that mold was growing on one of the dishes. This was not unusual, but what did strike him as odd was the fact that the staph bacteria had been killed all around the mold. Fleming had accidentally found the answer to his research. He discovered the makings of penicillin. This medicine has saved millions of lives over the years.

Alexander Fleming

Read the information and trace the dotted words.

penicillin	**staph**	**mold**
	bacterial infection	

Alexander Fleming was a researcher looking for a cure for

b _____ ; _____ .

Fleming found many agents that had antibacterial effects, but

none could kill strong bacteria like s _____ .

While cleaning his lab, Fleming came across a Petri dish

covered in m _____ . He noticed the staph

bacteria around the mold had been killed.

Fleming discovered what would later be known as

p _____ .

Alexander Fleming

Use the Word Bank to fill in the blanks.

Alexander Fleming was a _____.

Researcher Chemist Physicist

Fleming was interested in finding an agent that could kill _____.

Parasites Bacteria Mold

He accidentally found that some _____ can kill strong bacteria like staph.

Molds Water Alcohol

His discovery led to the making of _____ .

Aspirin Cough Syrup Penicillin

Alexander Fleming

Circle the correct answer.

Alexander Fleming was a _____.

Researcher Chemist Physicist

Fleming was interested in finding an agent that could kill _____.

Parasites Bacteria Mold

He accidentally found that some _____ can kill strong bacteria like staph.

Molds Water Alcohol

His discovery led to the making of _____ .

Aspirin Cough Syrup Penicillin

How many words can you find? Wite them below as you do.

Alexander Fleming

See how many words you can create using the letters from these words.

Niels Bohr was a Danish physicist well known for his investigations of atomic structure. Bohr broke the mold of classic physicists by explaining the nuclear model of the atom. Through his studies he discovered that electrons move in fixed orbits around the atom's nucleus. He also explained how they emitted or absorbed energy. In 1922 his work earned him a Nobel Prize for physics. Bohr left Denmark during World War II to avoid Hitler's army. He came to the United States and worked with Robert Oppenheimer to develop the atomic bomb. He later returned to Denmark and spent the rest of his life promoting the peaceful uses of atomic energy.

Niels Bohr

Read the information and trace the dotted words.

physicist	**structure**	**energy**
Nobel	**nuclear model**	

Niels Bohr was a Danish P _____ . He is well

known for his investigations of atomic S _____ .

He had a breakthrough in the word of physics by explaining the

n _____ m _____ of the atom.

Bohr won the N _____ Prize in physics in 1922. He

fled his country to avoid Hitler's army and went to the U.S.

There he began his work on the atomic bomb . He was an

advocate of the peaceful use of atomic _____ .

Niels Bohr

Use the Word Bank to fill in the blanks.

Niels Bohr was a Danish _____.

Researcher Chemist Physicist

He is most known or his investigations of the atomic _____ .

Structure House Model

In the United States, he worked with Robert Oppenheimer to develop the _____bomb.

Atomic Nucleus Physics

He was an_____for the peaceful use of atomic energy.

Advocate Opponent Enemy

Niels Bohr

Circle the correct answer.

Niels Bohr was a Danish _____.

Researcher Chemist Physicist

He is most known or his investigations of the atomic _____ .

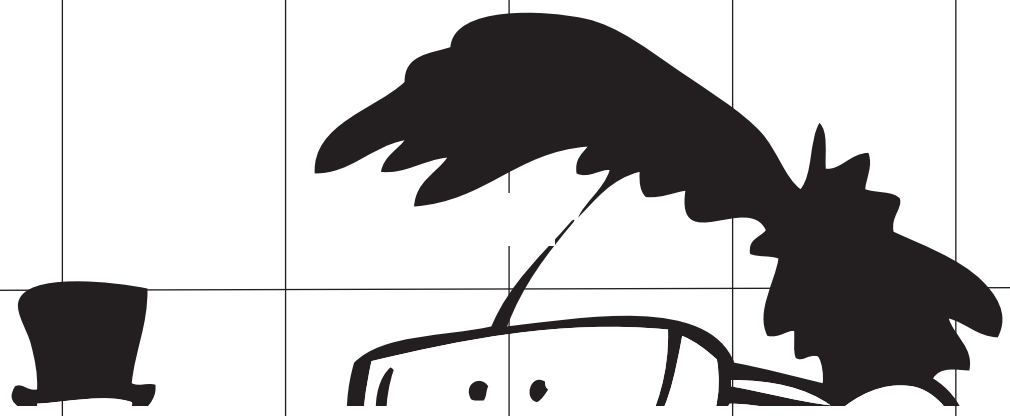
Structure House Model

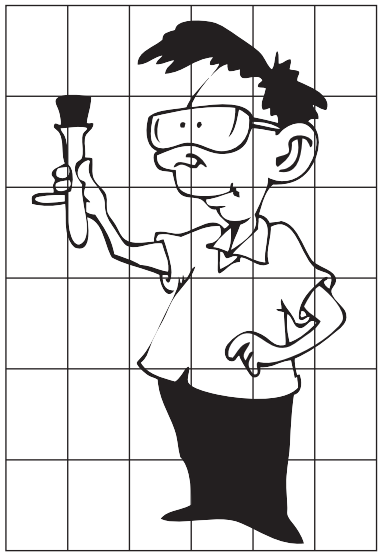
In the United States, he worked with Robert Oppenheimer to develop the _____bomb.

Atomic Nucleus Physics

He was an_____for the peaceful use of atomic energy.

Advocate Opponent Enemy





Niels Bohr

Draw the scientist in the grid.

Benjamin Franklin was a man of many talents. He is well known in America's history as a hero of colonial America and the signing of the Declaration of Independence. These are not Franklin's only accomplishments. He also made great contributions to science with his many inventions. Some of these include the lightning rod, the Franklin stove, and bifocal glasses. Though he was a strong political figure, he stayed interested in science, particularly in the study of electricity. He is well known for his experiment that involved flying a kite with a key attached during a lightning storm to prove there is electricity in the atmosphere. Each one of his inventions has had an impact on our everyday lives. Think how different our lives would be without electricity.

Benjamin Franklin

Read the information and trace the dotted words.

inventor	**stove**	**bifocal**
key	**rod**	

Ben Franklin was a hero of colonial America and an

_____

i _____ . Some of his inventions include the

_____ _____

lightning r _____ , Franklin s _____

_____

and b _____ glasses.

_____

Franklin flew a kite with a k _____ attached to prove

there is electricity in the atmosphere.

Benjamin Franklin

Use the Word Bank to fill in the blanks.

What is Ben Franklin famous for?

_____

What are some of his inventions?

_____

What was Franklin trying to prove with the kite and key experiment?

_____

How have Franklin's inventions had an impact on our world?

_____

Where and during what time period did he live?

What is Ben Franklin famous for?

Signing the Declaration of Independence and inventions

What are some of his inventions?

Lightning rod, Franklin stove, bifocal glasses

What was Franklin trying to prove with the kite and key experiment?

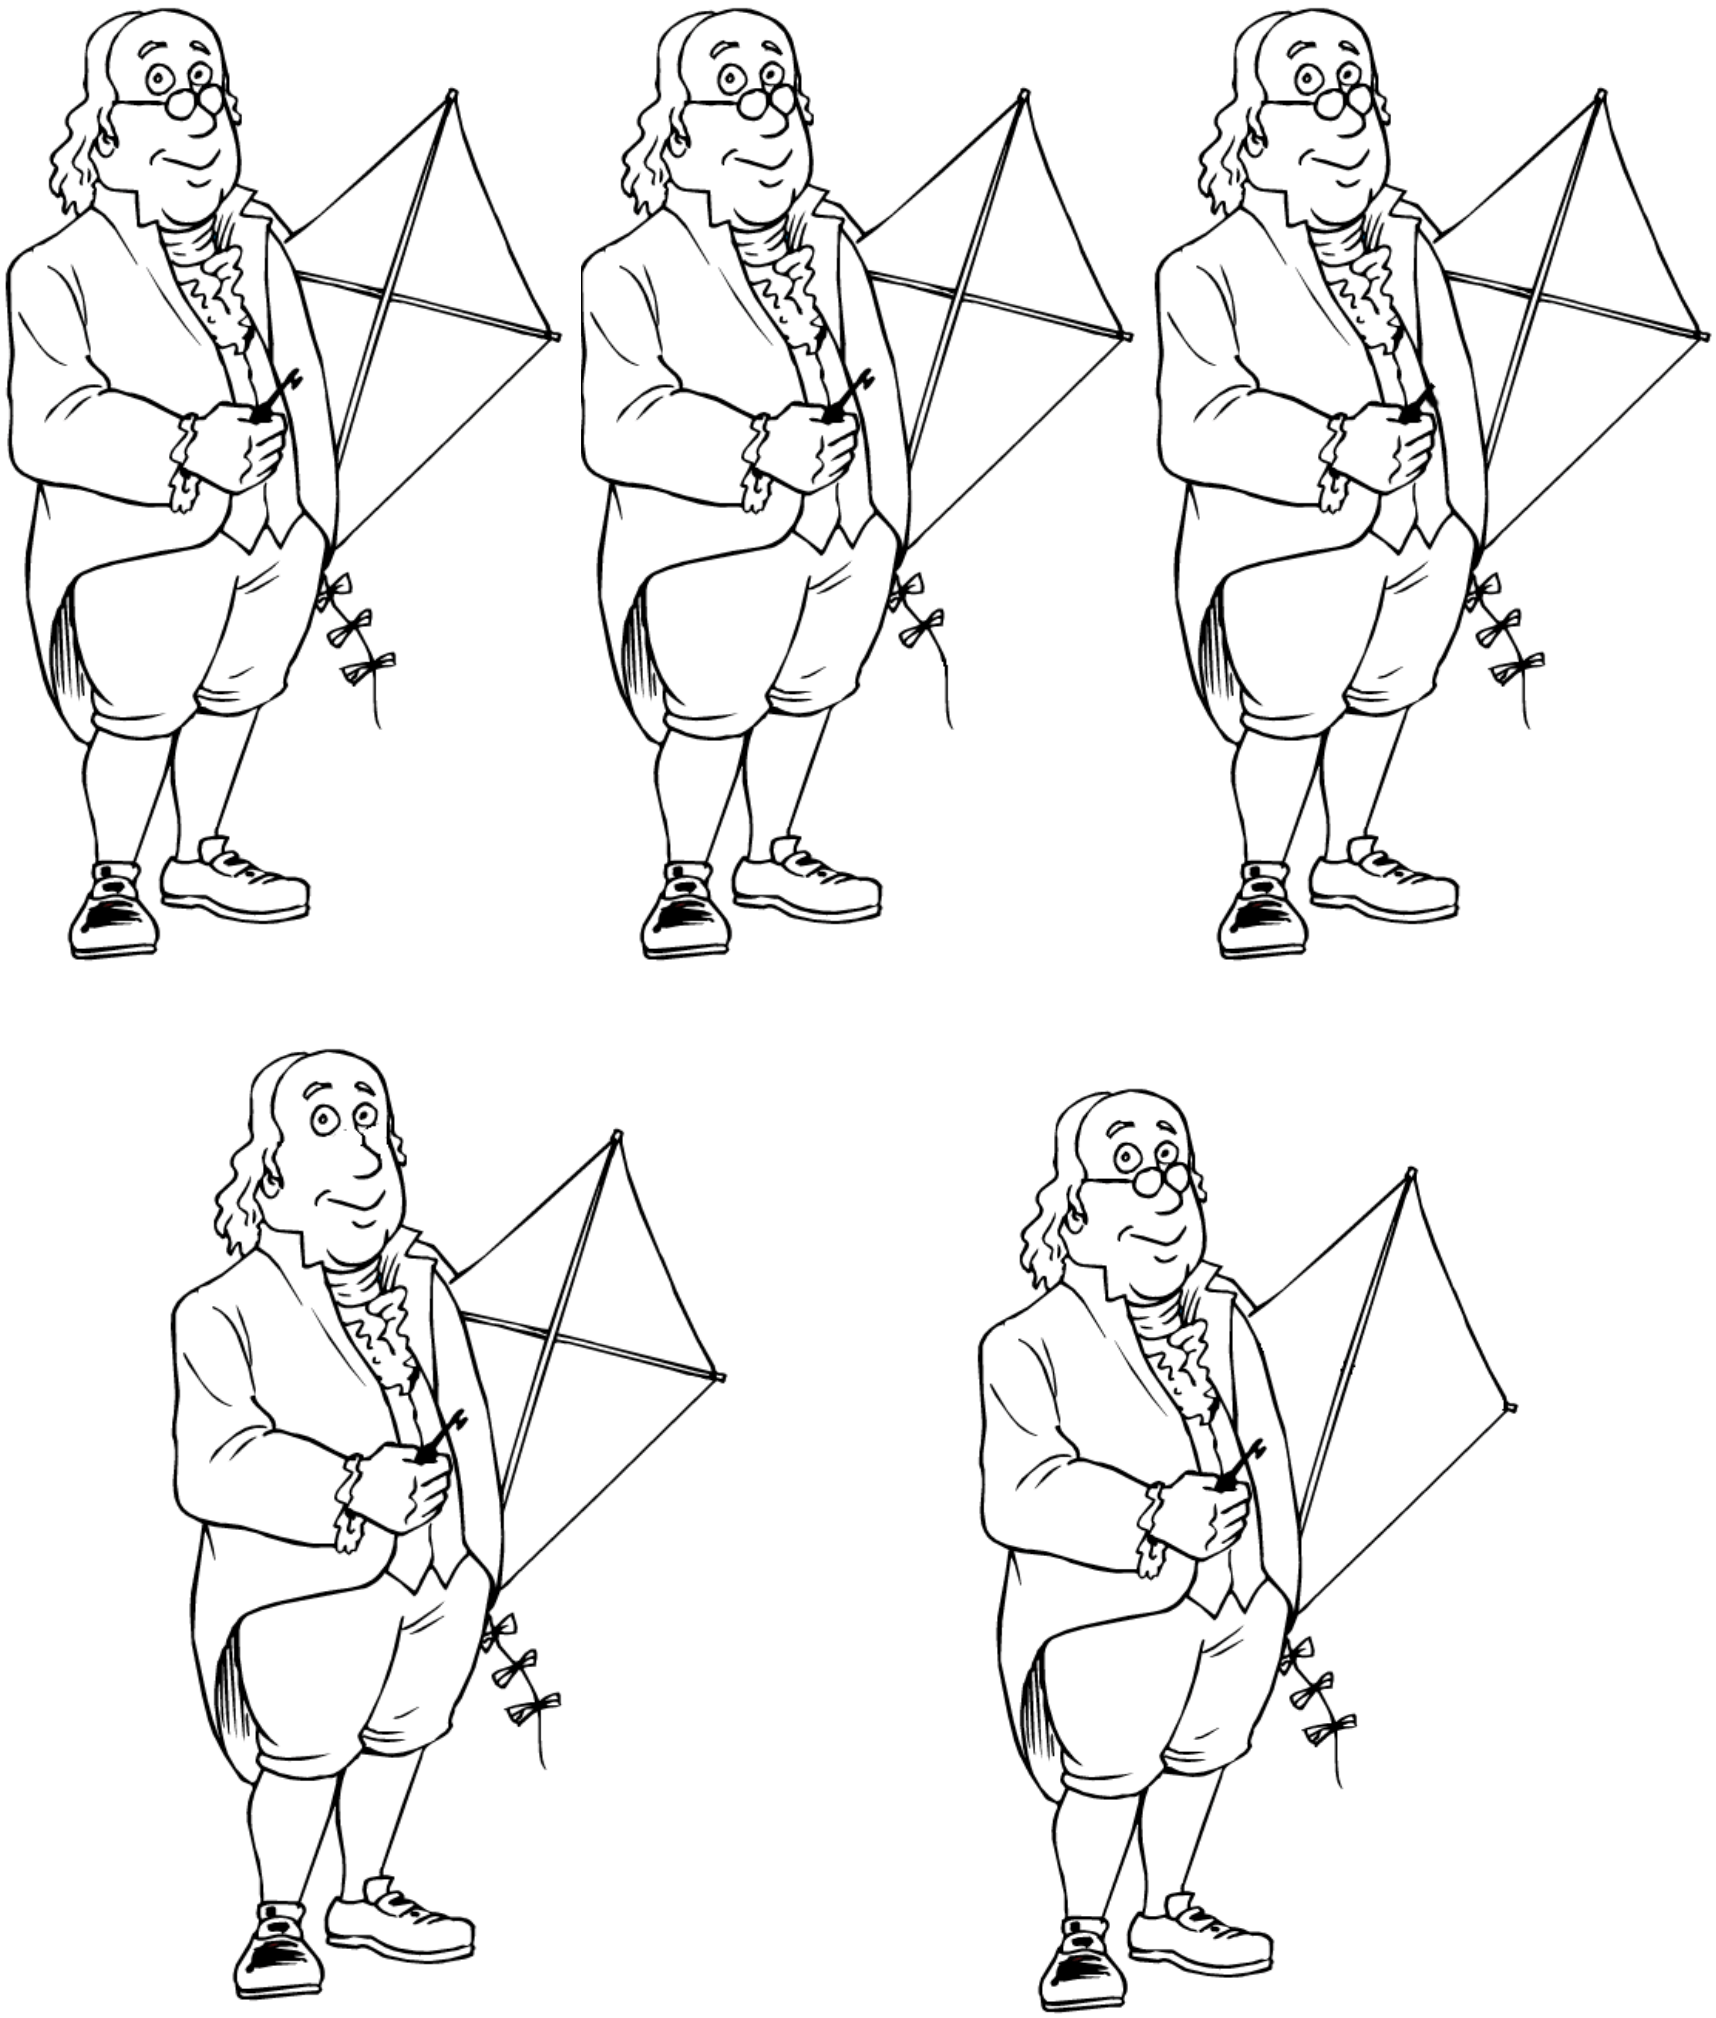
That there is electricity in the atmosphere

How have Franklin's inventions had an impact on our world?

He helped discover electricity

Where and during what time period did he live?

Colonial America



Benjamin Franklin
